2012 fourth quarter results

The operating profit was positive in the fourth quarter, and reached HUF 5.8 billion higher than in the preceding quarter, primarily due to the higher production and volumes sold and the favourable changes of exchange rates. The integrated petrochemical margin (in EUR terms) grew by 13% compared to the third quarter thanks to the weakening USD against the EUR.

Year 2012 results

Operating profit declined by HUF 4.3 billion in 2012 compared to 2011, due to the following negative factors: the unfavourable exchange rate changes, the significantly higher prices of natural gas, steam and electricity, as well as the lower production and sales volumes. Integrated petrochemical margin fell by 6% mainly due to the unfavourable turn of exchange rates (EUR weakened strongly against USD). The Hungarian forint weakened at a higher extent against the USD than against the euro. Therefore the positive effect of the exchange rate changes on revenues was not able to overcompensate the negative effect of higher feedstock costs. At the same time, the overall changes of feedstock and product prices could significantly improve our profitability; however lower production and sales volumes limited this effect.

Zsolt Pethő, the CEO of TVK Plc., emphasized:

"TVK maintained its productivity even in the extremely depressed business environment in 2012. Demand for plastic raw materials produced by us was still weak all over Europe and worldwide. Furthermore the production drop-out due to the general turnaround activities on the one hand and the permanent shut down of one plant (after a fire incident) on the other hand, resulted in lower overall capacity utilization rate below 80%. This had a further negative effect on our results besides the negative effect of the 6% fall of the integrated petrochemical margin, mainly as a result of the unfavourable exchange rate changes.

However we succeeded to maintain our operation in such circumstances as well. It is a real achievement. We are on the track with our efficiency improvement programs, the results of which will enable us to utilize our assets and resources more competitively.

The implementation of our new Butadiene extraction plant is in progress according to plans. We signed the agreement with the winner of the tender called for the selection of technology provider and the general contractor. From 2015 the new plant will play an important role in improving our product portfolio and profitability.

In 2013 we will continue our three-year efficiency and competitiveness improvement program, launched along the entire value chain in MOL Group. So, we could achieve the competitiveness of the top performing companies in our industry even before the start-up of our new butadiene unit. In other words, considering the profitability indicators in our industry, we intend to perform in the top quartile."

- ➤ Capacity unitisation rate in all producing plants of the company decreased by 15 percentage points to 78.1% year-on-year. The reasons of this were the periodic maintenance works and the scaled down production in line with the unfavourable polymer market circumstances. The fire incident at TVK LDPE-2 plant caused technological breakdown on October 31 2012 had a further negative effect. This plant is permanently shut down, reparations are being carried out continuously. We have involved external experts in the investigation to find the reason of the fire and to elaborate the necessary technical and safety measures.
- **Polymer production** decreased by 15%, while **polymer sales** were lower by 17% year on year, due to the shutdowns, the reduced market demand and the stoppage of the LDPE-2 unit.
- ▶ HUF 1,322 million realized exchange loss and HUF 82 million non-realized exchange gain was booked on receivables and payables as a consequence of sales and purchases, settled in foreign currencies. In 2011, realized gain was HUF 1,830 million and HUF 283 million was non-realized.
- ➤ The total of HUF 971 million gains from financial transactions include HUF 1,287 million **realized** and HUF 444 million **non-realized exchange gain** of currency credits and financial instruments settled in foreign currencies. In the year of 2011, we booked HUF 472 million realized and HUF 2,515 million non-realized exchange rate loss. The difference between the two periods is derived from the movements in EUR exchange rate.
- ▶ The **debt from the short and long term loan** of MOL Plc. amounted to HUF 24,482 million as of December 31, 2012. It increased, compared to both the level at the end of 2011 (by HUF 12,341 million) and 30 September, 2012 (by HUF 240 million).

Financial overview

Changes in accounting policies and estimates

There was no significant change in the accounting policy.

Profit and Loss Statement

Consolidated net sales amounted to HUF 374,591 million that is 9% lower than in the last year. As a result of the unfavourable external environment and planned maintenance shutdown carried out this year, the production and the sales volumes decreased which were only partly offset by the higher product prices and the weaker Hungarian forint compared to the last year's average.

Other operating income was down by HUF 1,169 million (35%). The main reason of the change is the HUF 2,113 million exchange gains on receivables and payables, booked in 2011, while HUF 1,240 million exchange losses were realized on other expenses in 2012. The income on saved CO₂ quota sale was higher than in the last year. The compensation received for damages declined, and the income from the sale of trading subsidiaries were lower year on year.

TVK Plc. realized 47% of its sales revenues from **export sales**. Czech Republic (16%), Italy (15%), Germany (14%), Poland (13%), Ukraine (6%), Romania (5%), Austria (4%) and Slovakia (3%) represented the majority of export sales.

Raw material costs showed a 8% decrease year on year due to the significant fall in the volume of feedstock purchased and the reduction in catalyst and chemical quoted prices, purchased for monomer production. However, weaker Hungarian forint against the USD had a cost-increasing effect. Besides the lower energy consumption on lower produced volumes energy costs raised by 22%. This was mainly due to the higher natural gas, electricity and steam prices.

REPORT ON THE FULL YEAR 2012 RESULT OF TVK GROUP

Personnel expenses were up by 1%, despite the staff reduction and due to the HUF 415 million provision created for the headcount rationalisation.

Depreciation, amortization and impairment increased by HUF 505 million (4%). The higher value of depreciation booked on the assets capitalised during the maintenance and reconstruction works in 2012 and the lifetime revision of the Olefin Plants' tools and equipment generated this increase.

Compared to the loss of HUF 4,981 million in the last year, the group realized a **profit on financial operations** of HUF 971 million. The change is mainly due to the EUR exchange rate change. HUF 1,731 million realized and non-realized exchange rate gain was generated during the revaluation of the loans and other assets received in foreign currency compared to a loss in the last year. HUF 687 million gain was booked on non-hedging transaction. HUF 383 million of income incurred on a successful collection of a loan, booked as bad debt in the former years. In 2012 interest expenses amounted to HUF 1,785 million.

TVK Group **profit before tax** amounted to a loss of HUF 9,243 million showing a year on year decrease of HUF 1,640 million. The **income tax** was HUF 788 million, deferred tax amounted to minus HUF 2,532 million. **Consolidated net loss** totalled at HUF 7,499 million.

Balance Sheet figures

The consolidated value of **non-current assets** did not change considerably, as the decline from the recognized depreciation was compensated by the capitalisation of maintenance tools and equipment, as well as recognized deferred tax receivables.

The value of **current assets** went up by 11%. It includes a 47% increase in inventories, basically due to the increased inventory level compared to the very low inventory of polymer finished goods in 2011, and in line with the positive market expectations in the beginning of 2013 we increased our inventory levels. Accounts receivables was down by 3%, caused mainly by the lower volumes sold in the actual period, and the net sales were moderated by stronger forint against euro. The value of other current assets grew by 24% which is attributable mainly to the higher amount of VAT reclaims.

Shareholder's equity dropped by 6%, which is attributable to the variance in the value of the profits.

Long term debt, net of current portion grew by 63%. Long term loans rose by 80% due to the borrowed parent company loan.

The value of **current liabilities** increased by 4%, mainly as a result of the provisions created on severance payments and on the lack of CO_2 quota.

Cash flow

Operating cash flow amounted to HUF -1,620 million. Within this, the changes in working capital decreased the cash flow by HUF 3,194 million as a consequence of the changes of the following factors: the amount of inventories increased, the sold polymer and olefin volumes (calculated at account receivables) decreased.

Net cash provided by investing activities decreased the cash flow by HUF 11,839 million. Within this the amounts disbursed to the suppliers amounted to HUF 14,899 million. Cash flow was improved by HUF 4,862 million on the sale of saved CO_2 quota and HUF 207 million income on the sale of TVK Polska Sp z.o.o.'s business. The payment on closing the forward transaction was HUF 2,908 million in 2012.

Net cash from financial operations increased the cash flow by HUF 14,268 million in the period under review, mainly due to the increasing revolving credit facility granted by MOL Plc.

Headcount

At December 31, 2012 the total consolidated headcount of TVK included 1,038 full time employees, which is less by 78 persons than the closing headcount on December 31, 2011. The sale of trading subsidiaries decreased the TVK headcount by 11. Outsourcing of Accounting and Tax activity (representing 44 employees) and reintegration of technical maintenance and the management of 0.4 kV electrical network (representing 42 employees) decreased total headcount by 2 employees. Further headcount reduction of 65 employees was the result of the efficiency improvement of the company as part of the group rationalisation program.

Capital projects

The total capital expenditure of TVK Group amounted to HUF 11 billion, within this HUF 10.7 billion is the expenditure incurred at TVK Plc. HUF 6 billion was spent on smaller maintenance and reconstruction activities aiming the continuous, smooth operation. Further HUF 2.7 billion was spent for individual projects and HUF 2 billion cost occurred in connection with the general turnaround. The capex amounting below the depreciation is a consequence of that we created sources for the accomplishment of future strategic projects (butadiene project).

Outlook and expectations for the period after December 31, 2012

From the beginning of the next year the operating profit is expected to be more positive as a consequence of the integrated petrochemical margin improvement and the more favourable external market environment. Polymer volumes produced in January are almost the same as the average of the fourth quarter 2012 and there will be no significant change in the production yield by product types. Production was not restarted in LDPE-2 plant.

Major events until the publication date

On November 15, 2012, agreement was signed with the general contractor of TVK's new butadiene-extraction Plant. The new butadiene-extraction unit with a 130,000 tons annual capacity will be built by a total capital expenditure of approximately HUF 30 billion. According to the plans, the production will start in 2015. The tender on building of the plant was gained by Lurgi/OTF consortium, with a technology based on BASF license. Implementation of the new plant will start in 2013 and production for trading purposes is to be launched in the first half of 2015. The implementation of the butadiene-extraction plant will employ hundreds of people at contractors and suppliers during the construction period.

In the fourth quarter, the shareholders owning more than 5% stake changed as follows. MOL Hungarian Oil and Gas Public Limited Company stake in TVK's Share Register increased from 86.79% to 94.86% as of December 27, 2012. The stake of Slovnaft, a.s. (subsidiary of MOL Plc.) decreased from 8.07% to 0%. The influence of MOL Plc. in TVK Plc. did not change, remained 94.86%.
