The balance of foreign currency receivables and liabilities are almost the same within the Group, therefore the foreign currency risk of the Group is not significant.

(This was HUF 29,463 thousands in the year 2017.)

Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting financial loss to the Group. The Group has adopted a policy of only dealing with creditworthy counterparties, and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. Trade receivables consist of a large number of costumers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable.
