

Continued growth at the Printing Company

August 17, 2022. **The turnover of ANY Security Printing Company PLC is HUF 23.3 billion in the first half of the year, of which HUF 8.6 billion comes from the export market.**

The turnover of ANY Security Printing Company in the first half of 2022 is HUF 23.3 billion, which is HUF 0.9 billion higher than in the same period of the previous year. Exports amounted to HUF 8.2 billion. Sales of the security products and solutions segment decreased, sales of card products doubled on the external markets compared to the base period. Consolidated EBITDA is HUF 3.619 billion, HUF 371 million less than in the first half of 2021. The operating result is HUF 2.478 billion.

"In a difficult economic environment, we managed to beat last year's record sales. Besides the general uncertainties in the economic environment, sourcing of raw materials has become more limited. I am proud that neither the worldwide chip shortage, nor the paper shortage, nor the dramatic increase in the price of all these, were insurmountable obstacles. It is becoming more and more difficult to pass on exchange rate fluctuations, rising energy and labour costs in the price of products. Major technical development is taking place at the Printing Company this year as well, with state-of-the-art technology and a high-value machine being added to the production process, the like of which has never been seen before in ANY's more than one and a half century history. The success of our subsidiaries in the first half of the year is also reflected in the figures. I would like to highlight the performance of the teams in Romania and Gyoma." - added to the first half-year report **Mr. Gábor ZSÁMBOKI, CEO of ANY Security Printing Company PLC.**
