## **Duna House Group's energy business strengthens with a major Hungarian manufacturer-constructor**

**DH Energy and LEHEL Group enter into a strategic partnership**

Budapest, 29 July 2024 - **DH Energy, the new business unit of Duna House Group, has entered into a strategic partnership with LEHEL Group, a long-established company with a nationwide coverage, to provide a one-stop shop for its customers. Thanks to this cooperation, the implementation of energy efficiency solutions offered by DH Energy's experts to residential and small business customers will be ensured by Aluradiátor Projekt Kft., thus, the real estate owners participating in the Home Renovation Programme will be provided with full support from the initial steps, through the construction, to the preparation of the post-certificate and the closing of the tender by the two companies' team of highly qualified and competent experts.**

Duna House Group's new energy business, DH Energy, aims to provide residential and small business customers with comprehensive and tailored energy efficiency solutions through dedicated professionals in nearly 150 offices of the Duna House network of real estate brokerages nationwide. *"Like DH Group as a whole, DH Energy, the energy leg of the DH Group, strives to offer its customers a reliable alternative to theoretical solutions and implementation in a one-stop shop, which is why it has entered into a strategic agreement with the LEHEL Group, a large and also nationally covered company, which has carried out the complete renovation of nearly 4,000 district-heated homes in the Home Warmth Programme, achieving an average reduction in energy bills of 20-27%." - said **Roland Deme, CEO of DH Energy Zrt.** "In recent years, the press has been abuzz with the rising cost of building materials and the shortage of skilled workers, so it is understandable that property owners are still reluctant to embark on what can seem like costly and nerve-wracking renovation work, even though energy investments and modernisation are value-adding investments that improve living standards and provide significant financial benefits for conscious property owners. The Home Renovation Programme offers excellent financing opportunities, and DH Energy and Aluradiator Project Ltd. combine their strength and expertise to guide their clients through the entire process from the first steps, from application, loan application, through full and professional implementation, to the closing of the project."*

Aluradiátor Projekt Ltd. is a member of the LEHEL Group, which has been manufacturing aluminium radiators since 1968. LEHEL's Viking and Panel radiators can be found in almost all "Kádár cubes" and panel houses, which are also one of the main target groups of the Home Renovation Programme, and are included in the register of key products of the ÉMI. The LEHEL brand, which has been awarded a Distinction for its district heating service, multiple Green Brands and Green Awards, has evolved to include a national network of contractors to upgrade properties in need of modernisation.

*"We have 55 years of tradition behind us and we guarantee the quality of the work that comes out of our hands. For customers upgrading under the Home Renovation Programme, our reliable teams of contractors are available anywhere in the country. As an integrator registered with the Renovation Programme, our company aims to make an impact on the entire housing stock through the renewal of tens of thousands of homes in strategic partnership with DH Energy." - said **Szabina Tónay, Managing Director of Aluradiator Project Ltd. and co-founder of LEHEL.***
