

OTP Bank Plc.

Summary of the full-year 2024 results

(English translation of the original report submitted
to the Budapest Stock Exchange)

Budapest, 7 March 2025

CONSOLIDATED FINANCIAL HIGHLIGHTS¹ AND SHARE DATA – NEW METHODOLOGY

The scope of adjustment items presented in the stock exchange report on consolidated level changed from 1Q 2024. According to the **new methodology** applied from 1Q 2024, only the goodwill impairment and the direct effect of acquisitions adjustment items are carved out and presented on consolidated level. From 3Q 2024, a materiality threshold was introduced: the relevant items are presented amongst adjustments only if the given item exceeds 10% of the quarterly consolidated profit after tax. For the sake of comparability, in the summary the relevant consolidated tables are presented in accordance with both the old and the new methodologies. For details, see *Supplementary data annex*.

Main components of P&L account in HUF million	2023	2024	Y-o-Y	4Q 2023	3Q 2024	4Q 2024	Q-o-Q	Y-o-Y

ACTUAL ESG RATINGS

AWARDS

Members of the Group **won the Bank of the Year award in four countries** in the prestigious international competition organised by **The Banker magazine**, part of the Financial Times Group: Albania, Bulgaria, Hungary and Slovenia.

PWM magazine, a sister publication of The Banker, selected OTP Bank as the best private bank in Central and Eastern Europe in terms of customer service.

Global Finance magazine announced the winners of the Sustainable Finance Awards. **OTP Group** was chosen as the **winner in one global category** ("The best bank in the world in terms of loans related to transition and sustainability"), **in two regional categories and in one country**.

S&P GLOBAL MARKET INTELLIGENCE PERFORMANCE RANKING, 2024

In 2024, S&P Global Market Intelligence OTP Bank was identified as the leading performer among the 50 largest publicly listed European banking institutions.

SUMMARY – OTP BANK'S FULL-YEAR 2024 RESULTS

The Summary of full-year 2024 results of OTP Bank Plc. has been prepared on the basis of its non-audited separate and consolidated IFRS financial statements for 31 December 2024 or derived from that.

For the purpose of including the group level consolidated eligible profit of the period in the regulatory capital and to comply with the provisions of Article 26 (2) of CRR, OTP Bank will submit the documents specifically prepared for this purpose as required by the legislation (OTP Group management representation letter, special purpose review report) to the Supervisory Authority until the deadline.

EXECUTIVE SUMMARY

Consolidated earnings: HUF 1,076 billion profit after tax in 2024 with an ROE of 23.5%; 9% y-o-y organic increase in performing loans, improving margin, cost efficiency and capital adequacy ratios

In 2024 the Group's profit after tax exceeded HUF 1,076 billion, which is consistent with 9% annual profit growth, while annual ROE reached 23.5%. The earnings per share (EPS) for 2024 hit HUF 4,050 whereas the end-2024 book value per share amounted to HUF 19,346.

In 2024 all geographical segments reported positive results, the share of foreign profit contribution reached 68%.

On 30 July 2024 the financial closure of the sale of the Romanian bank was completed, consequently, starting from 3Q the consolidated financial statements no longer include the contribution from the Romanian segment.

On 22 August 2024 the legal merger of the two Slovenian subsidiary banks of the Group, SKB Banka and Nova KBM was successfully completed. Following this, the operational merger was also successfully concluded.

The annual P&L dynamics were shaped, on one hand, by the positive adjustment items in the amount of HUF 85.5 billion (after tax) in the 2023 base period related to the direct effect of the two newly acquired banks' consolidation and the one-off direct effects of the sale of Romania. In 2024 no such adjustment items were presented, given that they remained below the materiality threshold. The acquired banks were conducive of the annual profit momentum through their on-going P&L contribution, too, whereas the divestment of the Romanian operation influenced rather volume dynamics. As for FX rate changes, the average rate of HUF weakened against the currencies of most foreign subsidiaries (by 3.4% against the EUR), but strengthened against the UAH and RUB. Out of the altogether 9% growth in the

Group's profit after tax, 2 pps was attributable to the FX translation effect.

Cumulated adjusted profit after tax improved by 19%, whereas the organic² and FX-adjusted growth was 10% y-o-y.

The full-year operating profit increased by 22%, within that total revenues grew by 17% mainly driven by the 22% increase in net interest income (+20% organically and FX-adjusted), boosted by both expanding business volumes and improving margins. It was the margin improvement at OTP Core (Hungary) that was particularly salient: from the lows hit in 1Q 2023, it improved gradually and by 4Q 2024 it even surpassed the level prevailing before the war and the extremely high rate environment. On the contrary, margin erosion, which has characterised the recent past continued in the Eurozone and ERM 2 countries.

Net fees and commissions grew by 13% organically and FX-adjusted. The other net non-interest income remained flat y-o-y despite significantly lower fair value adjustment of subsidized housing and baby loans at OTP Core. Operating costs went up by 11% organically and FX-adjusted. The annual cost to income ratio improved by 2.3 pps to 41.3%.

Total risk costs increased by 83% to HUF 158 billion, within that credit risk costs amounted to HUF 90 billion (+25%), corresponding with a credit risk cost ratio of 38 bps, against 34 bps in 2023. The jump in other risk costs was caused by the HUF 45 billion impairments created on Russian bonds held in the balance sheet of OTP Bank (Hungary) and DSK Bank (Bulgaria).

The full-year effective tax rate moderated by 0.9 pp y-o-y to 22.4%, as a result of several factors. Effective from 2024, the statutory corporate income tax rate was raised from 19% to 22% in Slovenia, and from 10% to 15% in Bulgaria as the global minimum corporate tax rate was adopted from 2024. In Ukraine the previously effective 25% tax rate was lifted to 50% in 4Q 2024 retroactively for the full-year. As opposed

² Regarding the y-o-y changes in the different P&L lines in full-year 2024, organic growth is defined as follows: without the contribution of Ipoteka Bank (consolidated from July 2023) and the Romanian bank sold in July 2024, and without the HUF 10.5 billion one-off gain presented on the other income line in 3Q 2024 in the wake of the deconsolidation of Romania.

Regarding the q-o-q changes in the different P&L lines in 4Q 2024, organic growth is defined as follows: without the HUF 10.5 billion one-off gain presented on the other income line in 3Q 2024 in the wake of the deconsolidation of Romania.

to this, total special banking taxes presented on the corporate income tax line moderated y-o-y.

In Ukraine, the corporate income tax rate applicable to other financial corporations was increased from 18% to 50%, effective from 2025.

The HUF 250 billion profit after tax realized in the **fourth quarter of 2024** marked a 22% q-o-q setback, mainly on the back of higher operating expenses and impairment charges.

4Q operating income decreased by 2% q-o-q, while it remained flat organically and FX-adjusted. Net interest income increased by 4% q-o-q (+2% FX-adjusted), mainly driven by stronger Hungarian, Bulgarian, Croatian and Russian performance. The consolidated net interest margin remained stable as a joint effect of improving Hungary and continuing slow erosion in the Eurozone and ERM 2 countries.

In the fourth quarter, net fees and commissions surged by 8% q-o-q, or HUF 11 billion: apart from seasonality and FX translation effect, one-off positive items amounting to HUF 4 billion at OTP Core related to cards business, as well as HUF 2.7 billion performance bonuses at OTP Asset Management (Hungary) played a key role. On the negative side, in Hungary the increased financial transaction tax rates took effect from August 2024, and FX conversion levy was introduced from October 2024.

Other net non-interest income ticked up by 3% q-o-q, or HUF 2.4 billion. The drop out of the HUF 10.5 billion one-off gain booked in 3Q within other income in relation to the deconsolidation of Romania was offset by q-o-q improving other revenues in several other geographical segments.

Operating costs increased by 14% q-o-q, primarily driven by seasonality.

In 4Q total risk costs reached HUF 92 billion, more than twice as much as in the 4Q 2023 base period.

Of this amount, provision for impairment on loan losses represented HUF 58 billion, owing mostly to Russia, Serbia, Hungary and Bulgaria. In Hungary, the extension of the interest rate cap scheme by another 6 months entailed nearly HUF 5 billion additional impairments.

In the fourth quarter, other risk costs hit HUF 34 billion, up by 22 billion q-o-q, marking an almost 3-fold increase:

- Croatia registered a q-o-q increase of HUF 5 billion, mainly explained by litigations;
- impairments created on Ukrainian government bonds amounted to HUF 5 billion;
- with an aim of lifting provision coverage, in 4Q altogether HUF 15 billion (3Q: 6 billion) impairment was booked in relation to Russian bond exposures held in the Hungarian and Bulgarian books, weighing on the other provisions line of OTP Core (HUF 10.5 billion)

and DSK Bank (HUF 4.6 billion). At the end of 2024, the total gross Russian bond exposures at OTP Core and DSK Bank amounted to HUF 135 billion equivalent, of which HUF 114 billion equivalent not due exposures carried interest. As a result of the impairments made in the fourth quarter, the provision coverage on Russian bonds increased by 10 pps q-o-q, to 73%.

Consolidated credit quality remained stable, main credit quality indicators continued to develop favourably. The ratio of Stage 3 loans under IFRS 9 declined by 0.3 pp q-o-q to 3.6%. The own provision coverage of Stage 3 loans moderated by 1.5 pps q-o-q to 59.5%. The Stage 2 ratio increased by 0.8 pp q-o-q to 13.0%, mainly as a reflection of higher ratios in Bulgaria and Slovenia.

Consolidated performing (Stage 1+2) loans expanded by 3% q-o-q FX-adjusted, thus the annual growth reached 9% without the effect of the deconsolidation of Romania. Corporate + MSE loans posted 2% y-o-y growth, adjusted for the sale of Romania as well as the repayment of a big-ticket corporate loan held in the Hungarian, Bulgarian and Slovenian books, in the total amount of HUF 317 billion. It was also favourable that Ukrainian corporate loans expanded by 20% in 2024. The uptrend seen in preceding quarters in household loan volumes remained intact: mortgage exposures demonstrated a 3% q-o-q expansion, whereas consumer loans grew by 6% over the quarter. In Bulgaria the y-o-y household loan growth was outstanding, but in 4Q the pace of growth in cash loans moderated in the wake of tightened macroprudential regulations. At the Uzbek Ipoteka Bank household loan growth remained modest in 4Q, too.

Consolidated deposits expanded by 2% q-o-q on an FX-adjusted basis, culminating in 6% y-o-y growth organically, so without the effect of the divestment of Romania. The quarterly expansion was driven by the household segment (+4%), whereas corporate + MSE deposits declined by 1%, partly as a result of corporate deposit outflows before the year-end in Hungary. Hungarian household deposits expanded by 3% q-o-q. Also, Uzbek deposits kept on increasing (+18% q-o-q).

The Group's net loan to deposit ratio hit 74% at the end of 2024, up by 1 pp y-o-y.

The volume of **issued securities** without retail bonds increased by 5% q-o-q, and 32% y-o-y. The volume of retail bonds stood at HUF 85 billion at the end of 2024, down by 58% y-o-y. The subordinated bonds and loans line declined by 6% q-o-q and 34% y-o-y. All these changes were primarily attributable to OTP Bank (Hungary).

The full-year net comprehensive income exceeded HUF 1,290 billion. **Shareholders' equity** increased by more than HUF 1,000 billion or 25% over the last

12 month. In June 2024 altogether HUF 150 billion dividend was paid to shareholders, equivalent of HUF 539.5 per dividend-eligible share. In 2024 the deduction from shareholders' equity due to treasury shares increased by HUF 125 billion: first, the available HUF 60 billion amount under the first treasury share buyback program which started after the central bank's single permission dated 12 February 2024, was utilized on 13 August. Furthermore, on 22 August 2024 OTP Bank received another single permission from the National Bank of Hungary to repurchase own shares in the total amount of HUF 60 billion, under which treasury shares worth HUF 55 billion were repurchased until the end of 2024, while the available amount was fully utilized on 13 January 2025.

Management guidance for the Group's 2025 performance

In 2025 the management expects marginal improvement in the operating environment.

Therefore:

- FX-adjusted organic performing loan volume growth may be above 9% reported in 2024.
- The net interest margin may be similar to the 4.28% achieved in 2024.
- The cost-to-income ratio may be somewhat higher than the 41.3% reported in 2024.
- Portfolio risk profile may be similar to 2024.
- ROE may be lower than in 2024 (23.5%) due to the expected decrease in leverage.

The 4Q capital adequacy ratio calculation included HUF 270 billion (HUF 964 / share) dividend, based on the latest decision of the Management Committee. The final decision on the Bank's dividend proposal will be made by the Board of Directors later in March and published on 3 April.

Considerations concerning capital allocation

The Bank may continue to buy back treasury shares. The latest buyback programme amounting to HUF 60 billion announced on 24 January 2025 was completed on 10 February. The Bank will continue its practice to announce new buyback programmes on the day they are approved by the National Bank of Hungary.

Due to the relatively low volume of treasury shares, the cancellation of the already repurchased own shares is currently not on the agenda of the Management. According to the relevant Hungarian legislation, the Bank's General Meeting is entitled to decide about the cancellation of the accumulated treasury shares.

Regarding capital adequacy ratio targets, the Management is committed to maintain strong capital position both in absolute and relative terms, therefore we target Common Equity Tier1 (CET1) / Tier 1 ratios comparable to our relevant regional peers.

While the top priority of capital allocation is to capture as much profitable organic growth as possible, at the same time the Bank continues to look for potential value-creating M&A opportunities.

The Management reckons the currently unutilized Additional Tier 1 (AT1) capital bucket as a reserve for any larger scale potential acquisitions.

Management will be aiming at sufficiently utilizing the Tier2 bucket, while part of the Tier2 bucket may also serve as a buffer for favourable organic and inorganic growth opportunities.

Consolidated capital adequacy ratios (in accordance with BASEL III)

At the end of 2024, the consolidated Common Equity Tier 1 (CET1) ratio according to IFRS and under the prudential scope of consolidation was 18.9%, marking 2.3 pps increase against the end of 2023. In the absence of AT1 instruments, this equals to the Tier 1 ratio. The consolidated capital adequacy ratio (CAR) stood at 20.3% at the end of December, underpinning an increase of 1.4 pps y-o-y.

At the end of 2024, the effective regulatory minimum requirement for the consolidated Tier 1 capital adequacy ratio (without P2G) was 12.5% which also incorporated the effective SREP rate, whereas the minimum CET1 requirement was 10.7%.

The components of capital requirements were shaped by the following recent changes:

- In 2024 the effective SREP rate was 120%, as a result the additional capital requirement was 1.6 pps. Effective from 1 January 2025, the SREP ratio increased to 122.4%, resulting in an additional capital requirement of 1.8 pps.
- Effective from 1 January 2024 the O-SII capital buffer is 2%.
- The effective rate of the countercyclical capital buffer is 2% in Bulgaria, 0.5% in Slovenia, 1.5% in Croatia, and from 1 July 2024 a countercyclical capital buffer rate of 0.5% was introduced in Hungary. Accordingly, on Group level the countercyclical capital buffer was 0.75% at the end of 2024. In Hungary, from 1 July 2025 another 50 bps increase is expected. Bearing this in mind, on consolidated level the countercyclical capital buffer rate is expected to increase to 0.9% in 2025.

Consolidated risk weighted assets (RWA) under the prudential scope of consolidation grew by 8% in the course of 2024. Within that, credit risk related RWA went up by 8%, or HUF 1,714 billion, mainly driven by FX effect (+HUF 1,050 billion y-o-y RWA impact), organic and regulatory effects (+1,506) and the deconsolidation of Romanian entities (-842).

The consolidated Common Equity Tier1 (CET1) capital grew by 23% or HUF 897 billion y-o-y, mainly due to the eligible profit for the full-year amounting to HUF 815 billion after dividend deduction. In 2024

HUF 270 billion dividend was deducted, pursuant to the latest decision of the Management Committee. The final decision on the dividend amount will be made by the Annual General Meeting, upon the proposal of the Board of Directors.

Items related to the other comprehensive income induced altogether HUF 216 billion y-o-y increase in the CET1 capital, mainly due to currency rate changes (revaluation reserves increased by HUF 190 billion y-o-y). This was partly counterbalanced by the HUF 126 billion y-o-y increase in the deduction relating to repurchased own shares. On 12 February 2024 and on 22 August 2024 National Bank of Hungary granted single permissions for OTP Bank to repurchase treasury shares in the amount of altogether HUF 120 billion. The entire approved amount for share buyback must immediately be deducted from the regulatory capital when the approval is received by the Bank.

As a result of the Basel 4 regulation effective from 1 January 2025, taking into account the transitional rules, the consolidated RWA increases by 4.7% at the time the regulation takes effect. Accordingly, the consolidated CET1 ratio declines by 85 bps *ceteris paribus*, based on 4Q 2024 data. The Basel 4 regulation will be introduced on a 'fully loaded' basis from 2030, which may trigger an additional 1.7% increase in consolidated RWA, based on end-2024 data. Thus, the total 'fully loaded' RWA effect of the Basel 4 implementation is expected to be around 6.5%.

MREL adequacy

As a result of recently raised MREL-eligible funds, against the mandatory minimum requirement of 24.2% for 31 December 2024, the MREL adequacy ratio of OTP Group reached 30.1% at the end of 2024. The ratio improved by 5.0 pps versus end-2023 and by 0.8 pp q-o-q. In the course of 2024, OTP Bank issued EUR 1.84 billion equivalent MREL-eligible bonds. In 2024 OTP Bank redeemed altogether EUR 900 million MREL-eligible bonds.

Credit rating, shareholder structure

At the end of 2024, the following credit ratings were in place:

- OTP Bank's long-term issuer credit rating by S&P Global is 'BBB-', the outlook is stable; the credit rating of the dated Tier 2 instrument is 'BB';
- the Senior Preferred bond rating by Moody's is 'Baa3', while the dated subordinated FX debt rating is 'Ba2'. On 4 December 2024, Moody's reaffirmed OTP Bank's ratings, and changed the outlook on long-term HUF and FX deposit ratings from stable to positive, and changed the outlook on the Senior Preferred debt from stable to negative. The outlook on the 'Baa3' long term issuer rating of OTP Mortgage Bank was also changed to negative; the mortgage bond rating is 'A1';
- OTP Bank Plc' issuer rating and Senior Preferred bond rating at Scope Ratings is 'BBB+', the Senior Non-Preferred rating is 'BBB' and the subordinated debt rating is 'BB+'; all carry a stable outlook;
- OTP Bank Plc's Long-Term Issuer Credit Rating (China national scale) by the Chinese Lianhe Credit Rating Co. is 'AAA', the outlook is stable.

Regarding the ownership structure of the Bank, on 31 December 2024 the following investors had more than 5% influence (voting rights) in the Company: MOL Plc. (the Hungarian Oil and Gas Company, 8.79%), and Groupama Group (5.22%).

DISCLAIMER – RISKS RELATING TO THE RUSSIAN-UKRAINIAN WAR

In 2022 Russia launched a still ongoing war against Ukraine. Many countries, as well as the European Union imposed sanctions due to the armed conflict on Russia and Russian businesses and citizens. Russia responded to these sanctions with similar measures.

The war and the international sanctions influence the business and economic activities significantly all around the world. There are a number of factors associated with the Russian-Ukrainian armed conflict and the international sanctions as well as their impact on global economies that could have a material adverse effect on (among other things) the profitability, capital and liquidity of financial institutions such as the OTP Group.

The war and the international sanctions cause significant economic damage to the affected parties and in addition they cause disruptions in the global economic processes, and they have negative impact – inter alia – on energy and grain markets, the global transport routes and international trade as well as on tourism.

OTP Group continues to monitor the situation closely. The OTP Group's ability to conduct business may be adversely affected by disruptions and restrictions to its infrastructure, business processes and technology services. This may cause significant customer detriment, costs to reimburse losses incurred by the OTP Group's customers, and reputational damage.

Furthermore, the OTP Group relies on models to support a broad range of business and risk management activities, including informing business decisions and strategies, measuring and limiting risk, valuing exposures, conducting stress testing and assessing capital adequacy. Models are, by their nature, imperfect and incomplete representations of reality because they rely on assumptions and inputs, and as such assumptions may later potentially prove to be incorrect, this can affect the accuracy of their outputs. This may be exacerbated when dealing with unprecedented scenarios, such as the Russian-Ukrainian armed conflict and the international sanctions, due to the lack of reliable historical reference points and data.

Any and all such events mentioned above could have a material adverse effect on the OTP Group's business, financial condition, results of operations, prospects, liquidity, capital position and credit ratings, as well as on the OTP Group's customers, employees and suppliers.

POST-BALANCE SHEET EVENTS

Post-balance sheet events cover the period until 21 February 2025.

Hungary

- On 13 January 2025 OTP Bank's share buyback program approved by the central bank on 22 August 2024 reached its maximum available amount of HUF 60 billion.
- On 24 January 2025 the Bank got another approval from the Hungarian National Bank to repurchase own shares in the amount of HUF 60 billion. The available amount was exhausted on 10 February 2025.
- From 13 January 2025 the consolidated MREL requirement is determined at 18.60% of the total risk exposure amount (RWA) and 6.02% of the total exposure measure (TEM) of the Resolution Group. The consolidated MREL requirement of OTP Bank applicable until this date was 18.94% and 5.78%. OTP Bank's Resolution Group consists of entities included in the prudential scope of consolidation of OTP Bank without the Slovenian OTP banka d.d. and its subsidiaries. Pursuant to the CRD OTP Bank has to meet the combined buffer requirement in addition to its MREL TREA requirement as institutions shall not use CET1 capital that is maintained to meet the combined buffer requirement to meet the risk-based component of the MREL requirement. This principle is applicable to the MREL TREA subordination requirement as well.
- On 30 January Tier 2 notes have been issued in the aggregate nominal amount of USD 750 million. The notes carry an annual coupon of 7.3% due semi-annually. The tenor was 10.5NC5.5, i.e. in the period between five and five and a half years the bonds can be redeemed on any day. The notes were listed on the Luxembourg Stock Exchange.
- On 7 February the EUR 500 million Fixed to Floating Rate Perpetual Subordinated Notes have been redeemed and the principal amount, together with accrued and unpaid interest was paid to the holders of the Notes.
- On 17 February OTP Bank announced the redemption of its €650,000,000 7.350 per cent. Senior Preferred Fixed-to-Floating Callable Notes due 2026 with the optional redemption date of 4 March 2025.
- As of end of February, the banking sector related key initiatives of the 'New Economic Policy Action Plan' launched by government decree 1311/2024 (X. 21.), are as follows (based on the communication of the Government and submitted bills):
 - From 1 January 2025, minimum wage increased by 9%. For 2026 and 2027 further 13% and 14% hikes have been agreed as part of the three-year wage agreement, assuming that economic growth and inflation will be in line with the expectations.
 - From 2 January 2025 the Workers' Loan Program is available at Hungarian banks. The loan is designed for young people aged 17-25 who are not eligible for student loans and who are employed in Hungary for at least 20 hours a week, or entrepreneurs who have an average income and undertake to work or run a business in Hungary for a minimum of five years. The maximum amount of the interest-free, free use, state-guaranteed loan facility is HUF 4 million, with a term of 10 years. The scheme also provides support for childbearing, with repayments suspended for two years following the birth of the first and second child, and half of the current debt waived for the second child and the full debt waived after the third one.
 - From 1 January 2025, in case of green loans the loan-to-value limit was increased to 90%, furthermore the payment-to-income limit was increased to 60% regardless of the income.
 - On 1 January 2025, the home renovation program was reintroduced to support families in towns with less than 5,000 residents, covering up to 50% of labor- and material costs with a cap of HUF 3 million. Those who have already availed themselves of the 2021-2022 home renovation subsidy are only eligible to utilize the new subsidy up to the amount of the HUF 3 million that remains unused at that time. From 1 February 2025, a state subsidized home renovation mortgage loan with a client interest rate of 3% and with up to HUF 6 million loan amount is available to finance investment costs.
 - In 2025, voluntary pension fund savings can be used free of tax for housing loan repayments, repayment of secured loans, and modernization or renovation of existing homes. The total amount of voluntary pension savings could be utilized, but only up to the balance available as of 30 September 2024.
 - From 1 January 2025, monthly HUF 150,000 fringe benefit can be paid to the employees under the age of 35 in order to support housing expenses (home rental or loan installment) above the current preferential upper limit of HUF 450,000 per year.
 - Half of the accumulated amount on SZÉP Cards can be used for home renovation in 2025.

- Between 1 April and 31 October 2025, based on the individual decision of the participating banks, 5% interest rate cap will be available for under 35 years old, first-time home buyers for newly granted green housing loans, with properties under 60 square meter and price lower than HUF 1.2 million per square meter. The rate cap will be applied in the first 5 years of the loan, the product has neither disbursement nor credit assessment fees.
- From 6 January 2025, as part of the Demján Sándor program, export stimulating loan and leasing structures are available in the total sum of HUF 400 billion, partly refinanced by EXIM Hungary. Some of the products are also available for enterprises planning to start export activities in the future.
- The interest rate of certain products under the Széchenyi Card Program MAX+ scheme was significantly reduced for contracts concluded after 1 March 2025: the interest rate on investment loans (Agricultural Investment Loan, Investment Loan) and the leasing scheme was reduced to 3%, while the interest rate on the Széchenyi Card Overdraft MAX+ (including the Tourism Card) and the Liquidity Loan was reduced to 4.5%. The uniform 0.5 pp reduction in client interest rates was facilitated by the burden sharing of KAVOSZ Ltd. (0.1 pp) and the banking sector (0.4 pp). The investment loans with the exceptionally favorable interest rate of the "GREEN" sub-structure are an exception to this, which are still available to businesses with a rate of 1.5%.
- Changes in the economic policy leadership:
 - As of 31 December 2024, pursuant to Act LXXXVI of 2024, the Ministry of Finance ceased to exist by merging into the Ministry of National Economy. Minister Márton Nagy remained in office unchanged as head of the Ministry of National Economy.
 - As of 4 March 2025, the President of the Republic appointed Mihály Varga, the former Minister of Finance, to head the National Bank of Hungary.
- Based on preliminary data published by the Central Statistical Office on 30 January 2025, the performance of the Hungarian economy increased by 0.5% q-o-q and 0.4% y-o-y in the fourth quarter. With this, the annual growth in 2024 was 0.6%. The average inflation in 2024 was 3.7%.
- The Financial Stability Council of the Hungarian National Bank announced an extension to the central bank's green capital requirement relief programs for credit institutions. The deadline for these programs was extended by one year, until the end of December 2026. The decision on whether to grant further annual extensions will be made based on a professional indicator system. Additionally, from 31 January 2025, the range of exposures that can be included in the discount program was further expanded.

Moldova

- On 10 January 2025, the National bank of Moldova raised the base interest rate by 200 basis points, from 3.6% to 5.6%.
- On 5 February 2025, the National Bank of Moldova further raised the base rate by 90 basis points to 6.5%.

Ukraine

- According to the announcement on 6 January 2025, the European Bank for Reconstruction and Development (EBRD) will be supporting the lending activities of OTP's subsidiary bank in Ukraine through a scheme that facilitates the sharing of portfolio risk. The risk-sharing instrument will enable the Ukrainian subsidiary to provide new financing to the local private business sector, amounting to EUR 200 million. The credit risks of these enterprises will be covered by the scheme, with the coverage amounting to 50 percent of the outstanding debt.
- On 23 January 2025, the National Bank of Ukraine raised the policy rate by 100 basis points to 14.5%.

Slovenia

- On 30 January 2025, ECB cut the policy rate by 25 basis points from 3.00% to 2.75%.

An event, that occurred in January 2025 regarding an item reported in the Group's books as a receivable from lending activities, was identified by the Group as a post-balance sheet event. The Group believes that the event has no retrospective effect for 2024 concerning Stage classification, therefore the Group did not change the Stage 2 classification of the affected receivable as of 31 December 2024. However, given that the Group obtained additional information regarding the circumstances that previously justified the Stage 2 classification, the Group recognized an additional HUF 13.9 billion impairment loss for the receivable in the Stage 2 category for 2024.

CONSOLIDATED PROFIT AFTER TAX BREAKDOWN BY SEGMENTS³ – NEW METHODOLOGY

OTP CORE (OTP BANK'S HUNGARIAN CORE BUSINESS)

Starting from the first quarter of 2024, Bajor-Polár Center Real Estate Management Ltd., CIL Babér Ltd., BANK CENTER No. 1. Investment and Development Ltd., and MFM Project Investment and Development Ltd. were included into OTP Core. Previously, these companies were presented in the Other Hungarian Subsidiaries segment, but their main business activity is letting property to OTP Bank. In 4Q 2024, MFM Project Investment and Development Ltd and Bajor-Polár Center Real Estate Management Ltd merged into BANK CENTER No. 1. Investment and Development Ltd. At the same time OTP Facility Management Ltd., which was already part of OTP Core before 2024, merged into CIL Babér Ltd.

¹ Cash, amounts due from banks and balances with the National Bank of Hungary; placements with other banks; repo receivables; securities and other financial assets.

In 2024, **OTP Core** generated HUF 806 billion profit after tax, including HUF 424 billion dividends received from subsidiaries.

During the year, items worth HUF 112 billion were presented amongst the adjustments at OTP Core, fully related to revaluation effect of the merger of the two Slovenian subsidiaries at the end of August, and not appearing at Group level. This item arose because a subsidiary directly owned by OTP Bank was merged into another company that was indirectly owned by the Bank. The amount presented as adjustment item was the result of the revaluation of SKB Banka to market value.

In 2024, OTP Core generated HUF 270 billion profit after tax without dividends from subsidiaries, 15% more than the HUF 234 billion profit in the base period. The improvement was strongly supported by net interest income, which surged by a third y-o-y from a low base. On the other hand, risk costs grew mainly as a result of increasing provision coverage rate on the Russian bonds in the Bank's balance sheet, and other income halved, owing to the drop in the fair value adjustment of the subsidized housing (CSOK) and baby loans. The fourth-quarter adjusted profit was HUF 61 billion, the 37% q-o-q decrease was mainly attributable to the q-o-q rising risk costs and the seasonally higher operating expenses.

The full-year amount of the special tax on financial institutions and the windfall tax, presented on the corporate tax line, totalled gross HUF 42.6 billion, and was accounted for in a lump sum in the first quarter. OTP Bank took the possibility of reducing the windfall tax by increasing the stock of Hungarian government bonds, as stipulated by the relevant regulation. In July 2024, the conditions for tax reduction were tightened; yet OTP Core realized HUF 5.9 billion reduction from the initial HUF 12.4 billion windfall tax payment obligation in 2024.

The adjusted profit before tax grew by 4% y-o-y. In 2024, operating profit improved by 18%, mainly as a result of the 34% jump in net interest income. This was to a great extent due to the improvement in net interest margin which hit rock bottom amid extremely high interest rate environment in the first half of 2023, then started to improve from the second half of 2023 after interest rate cuts began. The margin was also boosted by the turnaround in retail deposits: their declining trend that lasted until the end of 2023 broke in 4Q 2023, and the stock has been steadily expanding since then. Annual net interest margin rose by 61 basis points, to 2.88%, including a 6 bps q-o-q increase in 4Q, to 2.99%. Thus net interest income increased by 1% q-o-q in the fourth quarter.

Full-year net fees and commissions rose by 11% y-o-y, mainly supported by stronger income from fees on deposits, transactions, and securities

commissions. Meanwhile, the financial transaction tax paid by the Bank grew by 25%, or HUF 25 billion, as a result of an increase in the transaction tax rates from 1 August 2024 and the introduction of the new FX conversion tax on 1 October. In 4Q, commission income rose by 5% q-o-q: the seasonal effects and altogether positive card business-related one-offs⁵ were only partially offset by the increase in financial transaction tax as the higher rates kicking in from 1 August affected the full fourth quarter, and FX conversion levy was introduced on 1 October.

In 2024, other income halved y-o-y. The main reason behind the HUF 74 billion drop was that the HUF 25.8 billion positive revaluation result of the subsidized CSOK and baby loans in 2024 was HUF 61.5 billion lower than in the previous year.

Annual operating expenses were 7% higher than a year earlier: the jump in amortization caused by IT investments was counterbalanced by moderately increasing personnel cost and other expenses growing at inflation rate. The latter was influenced by the y-o-y decline in supervisory charges, which fully offset the increase in IT and other costs. The annual cost/income ratio improved by 2.4 pps to 51%.

In 2024, total risk cost amounted to HUF 51 billion; of that, loan loss provisions made up -HUF 1 billion, and other risk costs totalled -HUF 50 billion. In case of credit risk costs, releases induced by the revision of risk parameters, as well as recoveries realized from receivables managed by OTP Factoring counterbalanced the HUF 10.4 billion (including HUF 4.8 billion in 4Q) provisioning triggered by the extension of the interest rate cap. Other risk cost was largely shaped by the HUF 38 billion impairment on the Bank's Russian government bond portfolio, and the revaluation of investments in 2Q. In the fourth quarter, HUF 10.5 billion impairment on Russian bonds together with HUF 1 billion on the growing Hungarian government bond portfolio were the key factors behind other risk costs.

Loan quality trends were favourable in 2024. In year-on-year comparison, the ratio of both Stage 3 (-0.1 pp) and Stage 2 (-1.3 pps) loans declined, in which the positive development in household loan quality played an eminent role. The drop in the Stage 3 ratio was supported by the sale of non-performing loans in 4Q. The coverage of Stage 3 loans improved by 2.4 pps y-o-y, to 58.2%.

Issued securities and total shareholders' equity (via the inclusion of full-year profit) generated 4% y-o-y growth in total liabilities and shareholders' equity. On the asset side this materialized in the increase in performing loans and financial assets. Total assets declined by 2% q-o-q.

⁵ The refund from card companies totalled HUF +7 billion, credit card cashbacks to customers amounted to HUF -4 billion.

The volume of performing (Stage 1+2) loans grew by 6% in 2024 (FX-adjusted), thanks to the strengthening demand for retail loans.

In the retail segment, performing mortgage loans increased by 2% q-o-q, accelerating the y-o-y growth rate to 13%. In 2024, 31% of customers decided to sign housing loan contract with OTP Bank; thereby, the amount of new housing loan contracts for both market-based and subsidized loans more than doubled y-o-y, in line with the market's growth. The voluntary interest rate cap on newly placed housing loans, applied by major banks in the first half of the year, expired on 30 June, but this only slightly reduced applications for housing loans in the second half of the year: after the decline in 3Q, the volume of loan applications picked up again in 4Q.

In 2024, the volume of CSOK subsidized housing loans applications amounted to HUF 126 billion, including HUF 33 billion the fourth quarter. Thus the CSOK Plus loans, which have been available since 2024, made up more than 80% (4Q: 90%) of the HUF 157 billion subsidized loan contracts signed in 2024.

Consumer loan volumes rose by 3% in the fourth quarter, bringing the y-o-y growth rate to 10%. The 15% y-o-y expansion in cash loans was the key driver of growth, in 2024 new cash loan disbursements surpassed that of the preceding year by more than 65%, exceeding the market dynamics. Baby loan disbursements were flat year-on-year, thus the stock grew by 7% y-o-y.

Corporate + MSE volumes stagnated y-o-y, affected by the repayment of a big ticket corporate loan in 3Q. Without that effect, the y-o-y growth would have been 5%. The increase in corporate+MSE loans accelerated to 4% q-o-q (FX-adjusted) in the fourth quarter.

OTP Bank's market share in loans to non-financial corporations rose by 0.3 pp, to 19.5% since the end of 2023. The Széchenyi Card MAX+ loan programme generated HUF 370 billion new placement in 2024 (HUF 62 billion in 4Q), resulting in 44% flow market share. Of the HUF 200 billion additional envelope of the Baross Gábor loan programme available from 2024 (exhausted in February 2024), Eximbank approved HUF 33 billion worth of deals for OTP Bank.

The FX-adjusted stock of deposits from customers was stable year-on-year. In a favourable development, household deposits grew by 10% y-o-y, supported by an increase in current account volumes as well by the 'Persely' (Piggy Bank) feature

launched at the end of 2023; the uptrend continued in 4Q (+3% q-o-q). There was an outflow from corporate + MSE deposits at the end of the year (-5% q-o-q). Accordingly, the closing stock contracted by 9% compared to the end of 2023, but the annual average stock deposits from companies remained stable.

As a result of the Bank's active presence on capital markets, the volume of issued securities (without retail bonds) surged by 38% y-o-y. At the end of 2024 the volume of retail bonds reached HUF 85 billion. In 2024, a total amount of EUR 1.8 billion international public bond issuances and a private placement of CNY 300 million were carried out; all bonds were MREL-eligible securities. The annual portfolio dynamics were significantly influenced by the fact that the Bank exercised the call option for two previously issued securities in July 2024, totalling EUR 900 million (of which EUR 500 million were Tier 2 bonds presented under subordinated bonds and loans). In the course of 2024 the volume of bonds issued under the Bank's domestic bond program declined by almost HUF 100 billion. OTP Mortgage Bank issued mortgage bonds with a total face value of HUF 190 billion, while HUF 271 billion matured during the year.

Recently the following relevant **regulatory changes** were announced in Hungary:

- According to Government Decree No. 356/2024 (XI. 21.) published on 21 November 2024, in 2025 the windfall profit tax burden payable by OTP Group's Hungarian group members might be around HUF 53 billion (before corporate income tax), assuming the full utilization of the reduction opportunity related to the increase in the stock of government securities.
- From 1 November 2024, the client interest rate of Széchenyi Card Programme's investment loan products for Hungarian micro, small and medium-sized enterprises was lowered to fixed 3.5%, from the previous 5%.
- The government decrees of 388/2024 (XII. 11.) and 437/2024 (XII. 23.) have amended the terms and conditions for the subsidized baby loan so the interest-free feature of the loan may be regained in certain cases and the eligibility age limit for wives increased from 30 the 35 years.
- In government decision 1311/2024. (X. 21.), Hungary's government announced the 21-step 'New Economic Policy Action Plan', the elements of which, launched after 1 January 2025, are detailed in the *Post-balance sheet* events section.

In 2024, **OTP Fund Management** generated HUF 24.6 billion profit, thus increasing its annual profit by 25% y-o-y. More than HUF 8 billion of the annual profit was realized in the fourth quarter (+61% q-o-q).

Annual net fee and commission income increased by 17%, driven by the growth of assets under management. The average annual rate of the fund management fee (1.11% in 2024) was 15 basis points lower than last year. Net fees and commissions doubled q-o-q in the fourth quarter, mainly driven by the HUF 2.7 billion success fee, for funds generating above-benchmark yields (2023: HUF 5.2 billion).

In 2024, other income jumped by 29%, owing to the gain on securities at fair value in the Company's own books.

Operating expenses for the full year were 1% higher than in the previous year. The 13% increase in other expenses largely stemmed from higher expert fees and rising IT costs, while the change in personnel expenses was mitigated by a decrease in bonus payments.

In the Hungarian fund management market, the uptrend in investment funds assets continued. On top of attractive returns and price fluctuations, positive

capital inflows also contributed to asset growth. Despite varying degrees of outflows in different categories, on balance, the inflow of capital exceeded outflow. Regarding individual asset categories, bond funds retained their leading position, but the assets of real estate funds, which ranked second in the previous year, barely rose in 2024, and it was overtaken by mixed funds and absolute return funds.

In the case of OTP Fund Management, the asset of bond funds grew by 33% y-o-y, surpassing HUF 2,500 billion, thus it made up more than half of managed funds' volumes at the end of the year. Among the other categories, mixed funds, which is currently the second largest category, skyrocketed (+90% y-o-y), and absolute return funds also marched higher (+37% y-o-y), benefiting from the effect of positive returns and capital inflows, while money market funds experienced capital outflows.

Overall, the volume of funds managed by OTP Fund Management exceeded HUF 4,600 billion (+6% q-o-q, +32% y-o-y) at the end of December; maintaining its position as the market leader with 31.5% market share in the securities market.

In 2024, **Merkantil Group** posted HUF 11 billion adjusted profit after tax (+63% y-o-y), which brought its full-year ROE to 17.9%.

Annual operating profit shrank by 19%, as a result of stagnating total income caused by narrowing net interest margins as well as operating expenses expanding by 18%. Net interest income declined by 8% y-o-y as income from vehicle rental was retroactively reclassified from interest income to other income in 3Q, for the full year. This reclassification has reduced annual net interest income by a total of HUF 1.2 billion. Without the effect of this reclassification, net interest income dropped by 4% y-o-y as net interest margin narrowed. This shifting caused most of the increase in other income.

The 18% y-o-y increase in annual operating expenses stemmed from the growing personnel expenses, deductible taxes (under other expenses), as well as from higher IT and real estate related costs.

The total risk costs line printed HUF 2.5 billion positive amount in full year 2024, including almost +HUF 4 billion in the fourth quarter driven by the revision of IFRS 9 model parameters.

In q-o-q comparison, profit after tax tripled, to HUF 5.6 billion, mainly due to positive risk costs. Net interest income improved by 12%, while other income fell by 54% q-o-q mainly due to the base effect of the previously mentioned reclassification in 3Q. The 31% q-o-q growth in 4Q operating expenses largely stemmed from a seasonal increase in personnel expenses.

The ratio of Stage 3 loans sank by 0.3 pp q-o-q and by 0.5 pp y-o-y, to 2%. The coverage of Stage 3 loans dropped by 3.9 pps y-o-y, and that of Stage 2 loans declined by 2.4 pps.

FX-adjusted performing (Stage 1+2) loans grew by 14% y-o-y, including a 16% expansion in leasing exposures, while corporate loans fell by 1%. Performing loan volumes expanded by 2% q-o-q.

Credit demand benefited from the state subsidized loan facilities: under the KAVOSZ Széchenyi Card programme, customers concluded subsidized loan agreements totalling HUF 168 billion (including HUF 84 billion in 2022, HUF 43 billion in 2023, and HUF 41 billion in 2024) with Merkantil Bank, since the beginning of the scheme. Contracted amount under the Baross Gábor loan programme reached HUF 20 billion in 2024.

In 2024, **DSK Group** generated HUF 200.8 billion profit after tax, 1% more than in the previous year, the ROE was 21.5%.

Annual operating profit improved by 18%, mainly as a result of strong volume growth, which was offset by a higher risk costs and by the introduction of the global minimum tax regime on 1 January 2024. As a result, the effective corporate tax rate increased from 10% in 2023 to 14% in 2024, and the amount of tax grew by 57% y-o-y.

The full-year profit before tax improved by 7%, mainly driven by a 18% surge in net interest income, in line with the growth in total assets. Net interest margin was y-o-y stable, but its quarterly level has gradually declined by altogether 27 basis points since the peak hit in 3Q 2023, reflecting ECB base rate cuts. In 2024, the Bank steadily increased the share of long-term fixed-interest-rate bonds within the liquid asset portfolio. As the interest rate on these bonds is lower than that on short-term placements, this entailed a margin sacrifice in the short run. Net interest income was negatively affected by the increase in the mandatory reserve requirement rate from 10% to 12% in July 2023, as the central bank does not pay interest on that stock.

In the fourth quarter, net interest income grew by 3% q-o-q in HUF but was flat in BGN terms: on one hand the closing volume of performing loans rose by 2% q-o-q (FX-adjusted) and the increase in deposit volumes and thus in total assets continued. On the other hand net interest margin declined by 11 basis points q-o-q, simultaneously with the cuts in the ECB's key rate.

Annual fees and commissions grew by 16% y-o-y, mainly as a result of the increase in retail volumes and transactional turnover. Other income expanded by 42%, partly as a result of a y-o-y increase in currency conversion gains, as well as the refunds from card companies in the fourth quarter.

Throughout the year, cost level was under significant pressure from wage inflation and IT developments. As a result, annual operating expenses grew by 20% (by 16% in BGN), the cost/income ratio was 32.0%, which remained one of the lowest ones among Group members. In 4Q, those were typically marketing, real estate and wage costs that propelled expenditure's growth (+15% q-o-q, driven partly by seasonality).

In 2024, total risk cost amounted to -HUF 21.0 billion, of which credit risk costs made up -HUF 18.0 billion, bringing the credit risk cost ratio to 40 bps. In the fourth quarter, predominantly the revision of macro parameters generated additional impairments. On the other risk cost line, further HUF 4.6 billion impairment was set aside in 4Q, for the Russian government bonds held in the Bank's balance sheet; this effect was offset by releases on other securities and on litigations. The coverage of Russian bonds was 78% at the end of the year.

Underlying loan quality trends remained stable: the Stage 3 ratio declined by 0.2 pp, to 2.1% y-o-y, while Stage 3 loans' own provision coverage improved by 0.9 pp, to 58%.

Performing (Stage 1+2) loans surged by 11% y-o-y (FX-adjusted), propelled by the 24% y-o-y expansion in household loan volumes. New mortgage loan placements jumped by 39%, and cash loan disbursements grew by 21% y-o-y. In response to the strong (even at sector level) household loan flow, the central bank tightened macroprudential brakes for retail loans, effective from 1 October 2024: in the case of the newly contracted loans, the loan-to value (LTV) ratio was capped at 85%, the down payment shall be at least 10%, and the debt service-to-income ratio (DSTI) shall not exceed 50%. Corporate (including MSE) loans fell by 8% y-o-y, partly because of the repayment of a larger loan affecting several Group members, as well as the transfer of another larger loan to OTP Bank Serbia in 3Q; without them, corporate + MSE loans would have expanded by 1% y-o-y. The leasing exposure of the Bulgarian operation grew by 14% y-o-y (FX-adjusted).

Deposits increased by 10% y-o-y (FX-adjusted), including a 2% rise in the fourth quarter, driven by retail deposits' growth. The 9% q-o-q decrease in corporate deposits was caused by seasonal fluctuation; the stock was y-o-y stable. The net loan/deposit ratio was 76% at the end of December.

By the legal and organizational integration of SKB and Nova KBM, the merger of the two Slovenian banks was successfully completed on 22 August 2024. The planned cost synergies are steadily utilized, most of them are likely to appear in 2025.

The **Slovenian operation** generated HUF 30 billion profit after tax in the fourth quarter of 2024, which brought the ROE to 15.9%. Thus the annual profit after tax profit hit HUF 113 billion, which is consistent with 12% y-o-y growth and 16.1% annual ROE. One reason for the y-o-y higher profit is that NKBM was consolidated starting from February 2023, therefore it gave only eleven months' profit contribution in the base period. The size of the profit after tax was adversely affected by the fact that the corporate income tax rate in Slovenia increased from 19% to 22% y-o-y.

The annual operating profit improved by 11% y-o-y; within that, net interest income grew by 14%, while fee and commission incomes were 17% higher than in the base period. The improvement in net interest income materially benefited from the fact that the level of benchmark interest rates declined slower and by a smaller degree than originally expected. Annual net interest margin (3.23%) overall stagnated y-o-y; however, the quarterly changes reflected a steady decline simultaneously with the ECB's interest rate cuts started from June. The annual net interest income benefited from an increase in the share of consumer loans within the product structure on the loan side, and from the investment of the liquidity surplus into assets with higher yields.

The 4Q result was partly influenced by the more than 3% q-o-q weakening of the average rate of the HUF against the euro. The tax burden fell sharply q-o-q as the effect of deferred tax asset related to NKBM's losses in the past and its future profit generation capability (so called tax loss carry forward); its size was EUR 14 million in the fourth quarter, almost HUF 6 billion.

The higher revenues in 4Q were driven by stronger fee and commission income and by the doubled other income; net interest income declined marginally. The q-o-q doubling of other income was partly due to the profit impact of approximately 87,000 dormant accounts closed in October in connection with the integration (approximately EUR 5.6 million before taxes).

Operating expenses rose moderately in 4Q; the increase in personnel costs was related to bonus payments at the end of the year, while the q-o-q higher administrative expenses were related to the rebranding of the two banks as well as IT and expert fees.

As part of the integration, the merged bank's branch network declined q-o-q, from 104 to 82 units by the end of December 2024. Meanwhile the number of ATMs dropped by 15 and the workforce declined by 70 people.

The Bank's annual cost/income ratio increased to 42.1%, from 39.8% in 2023.

In the fourth quarter, risk costs grew fivefold q-o-q; within that, credit risk costs tripled, half of it reasoned by higher provision in relation to some individual corporate exposures.

Despite of q-o-q higher Stage 3 and Stage 2 ratio, the quality of the loan portfolio was overall stable. The volume of Stage 3 loans increased by approximately HUF 5 billion q-o-q, which is partly a consequence of the methodological standardization, and in the case of some corporate exposures (steel industry, activities related to automotive manufacturing), the outlook for the operating environment deteriorated. Thus, the ratio of Stage 3 loans grew marginally, to 2%; their own provision coverage improved q-o-q.

The ratio of Stage 2 loans increased to 14.6% (+2.2 ppts q-o-q), mainly due to the reclassification impact of an individual corporate exposure. In case of the retail book the carry-over effect of applying the standardized methodology following the integration pushed up the Stage 2 ratio; their coverage increased, too. The annual credit risk cost ratio was 30 bps (2023: 9 bps), which is lower than the group-level indicator.

The moderate erosion of the FX-adjusted performing loan portfolio continued in 4Q, thus the portfolio shrank by 3% in the full year. Within the retail loan portfolio, the stock of consumer loans expanded dynamically, by 10%, while that of mortgage loans practically remained unchanged. The SME loan portfolio fell by 5% y-o-y, including a 10% q-o-q decline in 4Q, mainly as a result of the year-end repayment of revolving loan facilities. Corporate loans fell by 12% year-on-year, partly due to a large-amount early repayment and to generally subdued borrowing appetite.

The reorganizations relating to the integration affected the sales of mortgage loans particularly adversely, but in 2024 the bank lost its previous market positions in practically all major loan product segments. The losses of corporate debt volumes and market share can also be explained by technical reasons: the leasing company, which was sold due to legal obligations, repaid its previously existing loan in September (EUR 100 million).

FX-adjusted deposit volumes shrank by 3% y-o-y, with retail volumes remaining almost unchanged, while corporate deposits eroded by 12%. The Slovenian operation's net loan/deposit ratio eased by 2 pps q-o-q; its 60% level is still one of the lowest within OTP Group.

At the end of 2024, the Slovenian operation's MREL eligible liabilities exceeded EUR 900 million; four-fifths of which are Senior Preferred bonds.

The **Croatian bank** generated almost HUF 62 billion profit after tax (+16% y-o-y) in full year 2024, including HUF 11.2 billion in 4Q (-35% q-o-q). Based on average shareholders' equity and full-year profit, ROE was 14.2% last year.

Regarding profit dynamics, on the income side, net interest income, the weight of which exceeded 75% last year, expanded by 16% y-o-y, while performing loan volumes increased by double digits and net interest margin narrowed by 2 bps y-o-y. In 2024, the European Central Bank reduced the euro area's key interest rate four times, by a total of 100 basis points. In the declining interest rate environment, quarterly margins followed a slightly decreasing trend. In the last quarter of 2024, the margin was q-o-q stable, partly because the weight of retail loans, which enjoy higher margins, increased within loans. In the fourth quarter, net interest income grew by 6% q-o-q in HUF, and by 2% in EUR terms.

As a result of a broad-based growth, net fees and commissions increased by 13% last year. Within that, in the fourth quarter the 13% q-o-q drop predominantly reflected a seasonal effect: merchant commission revenues and income from card transactions both declined in the off season in tourism.

Full-year operating expenses grew by 14% (or 10% in EUR); within that, they were stable in EUR in the fourth quarter. As to annual dynamics, the increase in other expenses stemmed from higher IT and real-estate-related costs, while supervisory fees were

lower y-o-y. Overall, the cost/income ratio declined by 0.7 percentage points, to 47.0% last year.

Some HUF 2 billion positive risk cost supported profit in 2024. Within that, positive credit risk cost was more than HUF 10 billion, owing to recoveries on Stage 3 claims. In 2024, other provision amounted to HUF - 8.6 billion, mainly in relation to litigations.

Loan quality showed an improvement: the ratio of Stage 3 loans dropped by 1.0 pp y-o-y, to 2.9%, owing to the overall improvement of the loan portfolio, and the partial repayment and/or partial write-off of large corporate loans classified as Stage 3. The own provision coverage of Stage 3 loans kept on improving: it landed at 72.1% at the end of December.

Performing (Stage 1+2) loan volumes grew by 13% y-o-y and 1% q-o-q (FX-adjusted). The strengthening lending activity helped the retail portfolio surge by 18% y-o-y. The corporate portfolio increased slower (+5% y-o-y); within that, the decline in 4Q was related to early repayment of big ticket loans.

FX-adjusted deposit volumes grew by 5% y-o-y, including a 4% increase in retail and 5% surge in corporate (including MSE) deposits, due to the higher quality of services offered and the expansion of their scope, amid intensifying market competition. The Bank's net loan to deposit ratio stood at 100% at the end of December.

The total market share of OTP Group's Croatian operation rose y-o-y in both loan and deposit volumes, thus it stabilized its fourth place in the ranking of Croatia's loan market.

In 2024, the **Serbian banking group** realized more than HUF 66 billion profit after tax. The 14% y-o-y increase in annual profit was driven by stronger operating result, mitigated by the 30% higher risk costs. Based on average shareholders' equity and full-year profit, ROE was 16.5%.

During the year, revenues increased by 16% (by 12% in RSD terms). Within this, net interest income rose by 12%, supported by the expansion of both performing loans and of financial assets. Net interest margin topped out in 3Q 2023, and has been slowly eroding since then in the falling interest rate environment. Margin stood at 3.75% in 2024 (-12 bps y-o-y), it also sank by 12 bps q-o-q in 4Q.

Annual net fees and commissions grew by 18%, supported by stronger income from fees on deposits, transactions, and card commissions. Within this, the q-o-q increase in 4Q was due to the settlement of the card company cost reimbursement in October in the wake of higher card turnover.

During the year, operating expenses surged by 14% y-o-y (by 10% in RSD terms), as a result of the wage increase implemented in the high-wage-inflation environment, higher supervisory charges, as well as elevated IT, marketing, and training expenses. Cost efficiency indicators further improved; the annual cost/income ratio (37.8%, -0.7 pps y-o-y) was one of the lowest among group members.

Credit risk costs were 44% higher than in the previous year, thus the credit risk cost ratio jumped to 75 bps. Impairments for loan losses were mostly recognized in the last quarter: first, due to the elevated risks related to a large corporate exposure, it became warranted to increase the coverage level, and second, due to the HUF 2.1 billion impairment loss incurred because of the extension of the interest rate cap.

On 21 November, the National Bank of Serbia approved the extension of the mortgage interest rate cap introduced in October 2023, a measure that would have expired at the end of 2024. The interest rate cap on variable-rate loans increased from 4.1% in 2024 to 5% between 1 January and 31 December 2025.

Overall, loan portfolio quality improved: the ratio of Stage 3 loans was 2.6% at the end of December (-0.3 pp y-o-y), while their own provision coverage rose by 1.0 pp y-o-y, to 64.8%.

The performing (Stage 1+2) loan book grew by 11% y-o-y and 3% q-o-q (FX-adjusted). Within that, mortgage loans increased by 10% y-o-y and 3% q-o-q. As the upper limit of the available loan amount was raised, consumer loans expanded by 18% y-o-y (FX-adjusted), mainly driven by the growth in cash loans and car loans. The stock of corporate (including MSE) loans expanded by 8% y-o-y and 7% q-o-q.

The Serbian operation's deposit book grew by an FX-adjusted 17% y-o-y, to over HUF 2,300 billion at the end of December. Within this, the volume of retail deposits surged by 28% y-o-y, alongside with higher offered interest rates. This brought the net loan/deposit ratio to 96%, down from 144% at the end of September 2022.

The balance sheet of Ipoteka Bank was consolidated in the second quarter of 2023, and its P&L was included in OTP Group's adjusted P&L account starting from the third quarter of 2023.

Based on end-2024 data, **Ipoteka Bank** is the fifth largest bank in Uzbekistan, with almost 7% market share by total assets. The number of retail customers (1.8 million) surged by almost 18% since the Bank joined the Group at the end of June 2023, and grew by 4% compared to the previous quarter.

In 2024, the Bank generated HUF 53 billion profit after tax, which brought its ROE to 30%. Net interest margin improved by 23 basis points, while the cost/income ratio by 1.3 pps, and the cost-to-asset ratio by 0.3 pp compared to the previous year.

In 4Q 2024, Ipoteka Bank generated HUF 11 billion profit. The 43% q-o-q drop was shaped by a 32% fall in operating profit and higher risk costs. Net interest income dropped by 14% or HUF 4.2 billion q-o-q, predominantly owing to the base effect of the positive one-off items (+HUF 4.6 billion) in the previous quarter⁶. Had these one-off items not arisen in the previous quarter, net interest income would have increased by 2% q-o-q in 4Q.

In the fourth quarter, net fees and commissions decreased by 1% y-o-y. Other income has more than doubled q-o-q, owing to the FX revaluation result of certain off-balance-sheet exposures recognized in a lump sum at the end of the year.

The bank's cost/income ratio was 38% in 2024. Operating expenses amounted to HUF 15.7 billion in 4Q, thus remaining stable compared to the same period of the previous year, while their 43% q-o-q growth stemmed from higher personnel expenses, real estate-related costs, and supervisory charges.

In 2024, total risk cost amounted to -HUF 14 billion; of that, the -HUF 11.5 billion impairment on loan losses brought the credit risk cost ratio to 1.16%. This was due to the continuous review and development of the risk management process, and to the stabilizing credit quality indicators in 2024. In 2024, other risk costs arose mainly in 4Q, partly explained by provisions allocated to other assets and the fact that the impairment loss related to penalty interest was reclassified from other risk costs to the provision for impairment on loan losses line (in 4Q this increased other risk cost by HUF 0.8 billion, as the releases accounted for in 2024 were reclassified in one sum).

In 2024, the ratio of Stage 3 loans increased by 2 pps to 13.9%, mainly due to the shifting of corporate exposures in the first half-year, while in 4Q the indicator improved by 0.4 pp q-o-q. The own coverage of Stage 3 loans stood at 42.6%, while the gross own coverage⁷ grew near 77%. In 2024, not only credit quality trends stabilized, but the Bank's balance sheet structure also improved significantly: the net loan/deposit ratio improved by 86 pps y-o-y, to 178%, down from 307% at the time when Ipoteka Bank was consolidated into the Group. The net/loan deposit ratio, without the subsidized and state-refinanced mortgage loans, stood at 110% at the end of 2024.

At the end of 2024, deposits amounted to HUF 529 billion (+48% y-o-y, +18% q-o-q, FX-adjusted). Retail deposits rose by 43% y-o-y, and corporate deposits grew by 50%. The 32% q-o-q increase in retail deposits was caused by the higher deposits interest rates offered by the Bank, while the 13% q-o-q growth in corporate deposits stemmed from placements by a number of large corporate customers.

The performing loan book stagnated y-o-y, and rose by 3% q-o-q (FX-adjusted). Retail loans expanded by 12% y-o-y, well below market dynamics, also their quarterly growth rate remained moderate (3Q: +2%, 4Q: +1% q-o-q), in line with the fact that after the strong retail loan growth in the second half of 2023, in 2024 the management placed greater emphasis on improving operational and organizational efficiency, as well as on the automation and stabilization of lending processes, which was accompanied by a slowdown in lending activity. The volume of mortgage loans grew by 15% y-o-y and 3% q-o-q, largely owing to a newly launched state programme.

Corporate (including MSE) performing loans fell by 27% y-o-y, as a result of reclassifications to the Stage 3 segment and moderate disbursements. In q-o-q terms, the performing corporate loan portfolio expanded by 17%, mainly due to a big ticket loan disbursement to a large corporate client.

On 25 April, the Bank successfully refinanced bonds, which was necessary because the senior unsecured bonds issued in 2021 with nominal value of UZS 785 billion matured in April 2024. The new series was issued in a nominal value of UZS 1,370 billion (USD 108 million equivalent), with three-year maturity, and 20.5% annual coupon.

⁶Firstly, a corporate loan that had been previously classified as non-performing was paid back, which increased net interest income by HUF 2.6 billion in the third quarter. Secondly, interest income on exposures with zero net book value under local accounting rules, but higher than zero net book value under IFRS was not recorded previously, but in the third quarter, such revenues were accounted in a lump sum of HUF 2 billion.

⁷ The gross own provision coverage ratio of Stage 3 loans is calculated from all gross claims towards customers and all related provisions.

In 2024 **OTP Bank Ukraine**'s profit after tax amounted to HUF 41 billion (-8% y-o-y), as loan growth resumed, while stable liquidity and capital positions remained in place. Operating profit declined by 12% compared to the base period, but risk costs remained in the positive territory. All this resulted in an ROE of 22.4%.

In the fourth quarter, a loss of HUF 1 billion was incurred, as corporate income tax rose by HUF 14 billion q-o-q. This was due to the fact that on 10 October 2024, the Ukrainian parliament passed a law pursuant to which the corporate income tax rate on banks was increased from 25% to 50% retroactively for the whole year. In addition, effective from 2025 the corporate income tax rate for other financial corporations was raised from 18% to 25%.

Net interest income for the full year fell by 4% y-o-y in HUF terms (and grew by 1% in UAH terms), while the net interest margin narrowed by 84 basis points, mainly due to the lower interest rate earned on deposits placed with the National Bank of Ukraine. The overnight deposit rate at the central bank stood at 23% back in the first half of 2023, before a steady decline brought it down to 13% between July 2023 and June 2024. Since then, there have been two interest rate hikes: the National Bank of Ukraine raised rates by 50 bps on 12 December 2024, and by 100 bps on 23 January 2025.

The 4Q profit momentum was shaped partly by the hryvnia's 4.5% q-o-q appreciation against the forint's quarterly average rate. The 13% q-o-q (7% in UAH terms) income growth was driven by the tripling other income, while net interest income increased by 1% in local currency terms.

Operating expenses for the full year increased by 8% (+14% in UAH terms), predominantly driven by higher personnel expenses, largely owing to the general wage increase that exceeded the rate of inflation. Within other expenses, IT and IT services-related costs went up. The annual cost to income ratio rose by 4.3 pps y-o-y, to 32.7%, thus remaining significantly better than the Group's similar ratio.

Underlying loan quality trends kept on developing favourably: during the year, positive risk costs amounted to HUF 4.4 billion. Of that, HUF 9.1 billion positive credit risk cost was recorded, mostly in relation to the corporate and leasing portfolios, while on the other risk cost line, HUF 4.7 billion provision was created due to the Ukrainian government bond portfolio's dynamic expansion.

The ratio of Stage 3 loans in the portfolio improved by 10.5 pps y-o-y to 11.1%, and their own coverage ratio hit 73.7%. In 2024, HUF 31 billion worth of non-performing loans were sold/written off (including HUF 5 billion in 4Q). The downtrend in the ratio of Stage 2 loans continued in the fourth quarter; first, through the repayment of Stage 2 loans, second, thanks to the improvement in the corporate segment. Thus the Stage 2 ratio declined by 9.8 pps y-o-y.

Amid prudent lending standards, the FX-adjusted volume of performing (Stage 1+2) loans grew by 20% y-o-y, from a low base. Within that, retail consumer loans surged by almost 50% (FX-adjusted). The Government of Ukraine announced the Lending Development Strategy; as part of this, banks, including OTP's Ukrainian subsidiary, signed a memorandum in the summer of 2024 on lending to companies on favourable terms, particularly in the energy sector. Accordingly, corporate volumes expanded by 20% y-o-y, yet they sank by 2% q-o-q in 4Q.

The FX-adjusted deposit base expanded by 8% y-o-y; the engine of growth was the 11% y-o-y increase in the corporate book, while the retail book rose by 5%.

The bank's capital adequacy ratio significantly exceeded the regulatory minimum requirements, exceeding 39.4% at the end of December (regulatory minimum: 10.0%). Gross intergroup financing to the Ukrainian operation amounted to the equivalent of HUF 55 billion at the end of December 2025.

In 2024, the Montenegrin **CKB Group** realized HUF 24 billion profit after tax (+13% y-o-y). Its ROE exceeded 21%. Of the annual profit, HUF 6.2 billion was generated in the fourth quarter of 2024 (-8% q-o-q).

In 2024, total income expanded by 19% y-o-y, driven by a 19% surge in net interest income, as well as 25% jump in commissions, while other income halved. Both growing average volumes, and the rising interest margin (+38 bps) helped net interest income. The rise in net fees mostly stemmed from improving card fee income. Annual operating expenses grew by 16% in EUR, with personnel expenses, depreciation, and other expenses equally contributing to the increase. The Bank's cost/income ratio stood at 40.5% in 2024, 40 basis points higher than in 2023.

In 2024, credit risk costs amounted to +HUF 1.4 billion, mainly as a result of the revision of IFRS 9 model parameters in 3Q, and the release of HUF 1.2 billion provisions due to the improved credit quality in 4Q.

Loan quality indicators developed favourably during the year: the ratio of Stage 3 loans dropped to 2.9% (-1.3 pps y-o-y, -0.6 pp q-o-q). The own provision coverage of Stage 3 loans stood at 74.9% at the end of 2024 (+7.7 pps y-o-y and +4.7 pps q-o-q). The ratio of Stage 2 loans sank by 0.6 pp, to 6.8% y-o-y.

Performing (Stage 1+2) loans rose by 14% y-o-y and 4% q-o-q (FX-adjusted). The expansion of both outstanding stocks and disbursements was supported by the Bank's participation in the central bank's mortgage and cash loan rate reduction initiative, under which banks could voluntarily reduce lending rates on new disbursements between 18 April 2024 and 31 December 2024. In the case of CKB, for cash loans with maturity of less than six years, there was 2 pps decline irrespective of the loan amount; as a result, disbursements jumped by 34% y-o-y and the outstanding volumes expanded by 24%. In the field of mortgage loans, the Bank launched a new mortgage loan facility, to help first-time home buyers younger than 30. As a result, disbursement grew by 49% y-o-y and volumes expanded by 18%. Corporate loan disbursements also grew strongly in 2024, with placements increasing by 50% y-o-y. In 2024, the Bank entered the leasing market, thus leasing volumes amounted to HUF 2.8 billion by the end of the year.

The FX-adjusted deposit book expanded by 9% y-o-y, and 3% q-o-q. The y-o-y growth benefited from the 11% increase in retail deposits, as well as from the 7% rise in corporate + MSE deposits. The net loan/deposit ratio stood at 87% at the end of the year.

In 2024, **OTP Bank Albania** generated HUF 20 billion profit after tax (+70% y-o-y in HUF terms, +50% in local currency terms), including HUF 4.6 billion profit in the fourth quarter. In 2024, the Bank's ROE exceeded 20%.

At the end of 2024, the Bank's market share by net loan volumes was 13%, rendering it the third largest lender in Albania. At the end of the year, the number of bank branches was 50, and the number of employees was 700. In 2024, operating expenses fell by 22% y-o-y in local currency, thus the Bank's cost efficiency indicator improved by 16.3 pps compared to the previous year. This was largely due to acquisition completed in July 2022, as the realization of synergies began after the integration process was accomplished by December 2023. As a result, the cost-to-income ratio improved to 42.2% in 2024.

The annual operating profit increased by 68% in HUF (+50% in local currency terms), as a result of a 13% decrease in operating expenses and a 21% increase in total income. During the year, net interest income grew by 20%, net fees and commissions jumped by 22% and other income surged 30%. The increase in net interest income can be primarily attributed to the expansion of performing loan and the deposit volumes. In 2024, the amount of risk costs was +HUF 0.3 billion, mainly owing to the revision of the IFRS 9 risk parameters.

In the fourth quarter, operating profit declined by 7% q-o-q, reflecting a 3% decrease in total income, and a 4% rise in operating expenses. Net interest income surged by 5% q-o-q, while net fees and commissions decreased by 32% due to the strong tourist season in 3Q. Almost HUF 0.4 billion worth of positive risk costs emerged in 4Q.

The favourable loan quality trends continued: in the fourth quarter, the Stage 2 ratio dropped by 1.3 pps q-o-q, mainly because certain MSE loans were reclassified into Stage 1. The ratio of Stage 3 loans improved by 1.1 pps y-o-y, to 5.1%.

Overall, the FX-adjusted performing (Stage 1+2) loan book expanded by 19% in 2024, driven by a 12% increase in retail loans and a 24% growth in corporate. In 4Q the dynamic loan growth rate was maintained with 6% q-o-q expansion; within that, retail loans increased by 3% and corporate loans by 8%.

Customer deposits rose by 2% y-o-y (FX-adjusted), as retail deposits increased by 7% and corporate deposits contracted by 29%. The net loan-to-deposit ratio rose by 10 pps y-o-y, reaching the Group's level, 74%.

In 2024, **OTP Bank Moldova** generated HUF 11.5 billion profit after tax, 21% less than in the base period; of that, HUF 2 billion was realized in the fourth quarter (-51% q-o-q). ROE reached 17.4% in 2024.

In 2024, the Bank's total income grew by 4% y-o-y. Within that, the 6% drop in net interest income was largely influenced by the sharp decline in the interest rate environment from the highs at the beginning of 2023 (base rate in 1Q 2023: 17% vs. 3.6% in 2024 4Q). This was also the main reason for the 80 bps y-o-y erosion in net interest margin. The 28% surge in annual other income largely stemmed from large-amount currency conversions by corporations.

In the fourth quarter, total income declined by 2% owing to a 20% drop in other income, while net interest income grew by 11%. The reason for the q-o-q higher net interest income was a negative one-off item occurring in 3Q: then the ytd interest income (almost HUF 250 million) recorded on Stage 3 cash loans, which was 100% covered by provisions, was moved from interest income to the credit risk costs line. Without this one-off effect, interest income would have increased by 4% q-o-q, as a result of the expanding loan volumes. The decline in other income was caused by the drop in currency conversion income.

Full-year operating expenses grew by 15% in HUF and by 9% in local currency terms, predominantly because of higher wages and, under other expenses, owing to the rise in IT costs and supervisory charges. These items caused the q-o-q increase as well.

In 2024, HUF 0.6 billion worth of positive risk cost was recorded, partly as a result of a previously mentioned shifting, but the improving economic environment, and the revision of the IFRS 9 model parameters also had benign effects. In the fourth quarter, HUF 0.6 billion risk costs weighed on the profit.

The ratio of Stage 3 loans sank to 3.1% (-0.8 pp y-o-y, -0.3 pp q-o-q), and their own provision coverage was 63%, in a nearly 3 pps y-o-y uptick.

The FX-adjusted stock of performing (Stage 1+2) loans grew by 13% y-o-y, as retail loans increased by 12%, while leasing and corporate loan volumes expanded by 14% each. Retail loan growth largely stemmed from a 30% jump in consumer loan volumes; mortgage loans rose at modest pace of 3%. Loan volumes expanded by 8% q-o-q, driven by the corporate segment.

FX-adjusted deposit volumes stagnated last year; within that, retail deposits shrank by 6%, but corporate deposits grew by 11%. In q-o-q comparison, the retail deposit book grew by 4%, while the corporate one contracted by 7%, largely because of seasonal effects.

The net loan/deposit ratio stood at 48% at the end of the year. Deposits from banks continued their downward trend of recent quarters, reflecting the Bank's strong liquidity position.

¹The Corporate income tax line includes the corporate income tax in the Russian segment, as well as the dividend taxes incurred at other members of OTP Group because of the Russian Group members' dividend payment.

OTP Bank Russia generated HUF 136.9 billion profit in 2024, including HUF 45.7 billion in the fourth quarter. The HUF 11.6 billion q-o-q profit growth was driven by an increase in net interest income, offset by an increase in credit risk costs.

Corporate income tax surged by 70% y-o-y, owing to the higher pre-tax profit as well as the taxes associated with dividend payments⁸. Pursuant to the regulation passed in July 2024 the corporate income tax rate in Russia was increased to 25% from 1 January 2025, from the former 20%.

The annual net interest margin narrowed by 34 basis points y-o-y, while net interest income grew by 53%. In the fourth quarter, net interest income grew by 19% q-o-q due to expanding business volumes and the 66 bps improvement in net interest margin.

In 2024, net fees and commissions expanded by 35% y-o-y, mainly as a result of the rising account- and transaction fees owing to the growing deposit volumes.

The 30% increase in cumulated operating expenses in RUB terms was mostly shaped by inflation processes, while in Russia the number of branches has shrank by 42% and the number of employees by 23% since the beginning of the war. The bank's cost/income ratio was 27% in 2024.

The volume of Stage 3 loans declined significantly as a result of a sale of problem loans in the fourth quarter, bringing down the Stage 3 ratio to 4.8%. The annual credit risk costs tripled y-o-y, the credit risk cost ratio was 6%.

FX-adjusted performing (Stage 1+2) retail consumer loans grew by 79% in 2024, and by 23% in the fourth quarter. Although the increase was mainly determined by car loan and cash loan volumes throughout the year, the volume of POS loans also increased at the end of the year, owing to seasonal factors. Meanwhile, the performing corporate loan book shrank by another 37% in the fourth quarter; thus it contracted by a total of 96% compared to the pre-war level at the end of 2021.

FX-adjusted deposit volumes grew by 76% y-o-y and 16% q-o-q. The net loan/deposit ratio was 53% at the end of the year.

At the end of 2022, the Russian operation paid back the full amount of its expiring intergroup liabilities. In addition to this, RUB 41.8 billion dividend payment has been approved by the Central Bank of Russia since September 2023, including RUB 4.7 billion in the fourth quarter of 2024.

⁸ The Corporate income tax line includes the corporate income tax in the Russian segment, as well as the dividend taxes incurred at other members of OTP Group because of the Russian Group members' dividend payment.

On 30 July 2024, the sale of OTP Bank Romania S.A. to Banca Transilvania S.A. was completed. Simultaneously, the Romanian bank was deconsolidated, thus neither its balance sheet nor its profit was presented in the Group's balance sheet or result, starting from July.

The Romanian operation generated HUF 2 billion profit after tax between January and June 2024.

Definition of headcount number: closing, active FTE (full-time employee). The employee is considered as full-time employee in case his/her employment conditions regarding working hours are in line with a full-time employment defined in the Labour Code in the reporting entity's country. Part-time employees are taken into account proportional to the full-time working hours being effective in the reporting entity's country. The *other Hungarian and foreign subsidiaries*, and the *OTP Group* lines do not contain the headcount of agricultural businesses.

PERSONAL AND ORGANIZATIONAL CHANGES

On 26 April 2024, concerning the audit of OTP Bank Plc.'s separate and consolidated annual financial statements in accordance with International Financial Reporting Standards for the year 2024, the Annual General Meeting elected Ernst & Young Ltd. (001165, H-1132 Budapest, Váci út 20.) as the Company's auditor from 1 May 2024 until 30 April 2025.

Disclaimers

This Report contains statements that are, or may be deemed to be, “forward-looking statements” which are prospective in nature. These forward-looking statements may be identified by the use of forward-looking terminology, or the negative thereof such as “plans”, “expects” or “does not expect”, “is expected”, “continues”, “assumes”, “is subject to”, “budget”, “scheduled”, “estimates”, “aims”, “forecasts”, “risks”, “intends”, “positioned”, “predicts”, “anticipates” or “does not anticipate”, or “believes”, or variations of such words or comparable terminology and phrases or statements that certain actions, events or results “may”, “could”, “should”, “shall”, “would”, “might” or “will” be taken, occur or be achieved. Such statements are qualified in their entirety by the inherent risks and uncertainties surrounding future expectations. Forward-looking statements are not based on historical facts, but rather on current predictions, expectations, beliefs, opinions, plans, objectives, goals, intentions and projections about future events, results of operations, prospects, financial condition and discussions of strategy.

By their nature, forward-looking statements involve known and unknown risks and uncertainties, many of which are beyond the control of OTP Bank. Forward-looking statements are not guarantees of future performance and may and often do differ materially from actual results. Neither OTP Bank nor any of its subsidiaries or directors, officers or advisers, provides any representation, assurance or guarantee that the occurrence of the events expressed or implied in any forward-looking statements in this Report will actually occur. You are cautioned not to place undue reliance on these forward-looking statements which only speak as of the date of this Report. Other than in accordance with its legal or regulatory obligations, OTP Bank is not under any obligation and OTP Bank and its subsidiaries expressly disclaim any intention, obligation or undertaking to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. This Report shall not, under any circumstances, create any implication that there has been no change in the business or affairs of OTP Bank since the date of this Report or that the information contained herein is correct as at any time subsequent to its date.

This Report does not constitute or form part of any offer to purchase or subscribe for any securities. The making of this Report does not constitute a recommendation regarding any securities.

The distribution of this Report in other jurisdictions may be restricted by law and persons into whose possession this Report comes should inform themselves about, and observe, any such restrictions. Any failure to comply with these restrictions may constitute a violation of the laws of other jurisdictions.

The information contained in this Report is provided as of the date of this Report and is subject to change without notice.

**Alternative performance measures
pursuant to the National Bank of Hungary 5/2017, (V.24.) recommendation⁹**

Alternative performance measures name	Description	Calculation (data in HUF million)	Measures value		
			2023 old methodology	2023 new methodology	2023 new methodology
Leverage, consolidated ¹⁰	The leverage ratio is calculated pursuant to Article 429 CRR. The calculation of the indicator is designed quarterly by the Bank for the prudential consolidation circle.	The leverage ratio shall be calculated as an institution's capital measure divided by that institution's total exposure measure and shall be expressed as a percentage. Example for 2024: $\frac{4,842,978.2}{46,412,734.7} = 10.4\%$ Example for 2023: $\frac{3,945,569.6}{42,426,769.2} = 9.3\%$	9.3%	9.3%	10.4%
Liquidity Coverage Ratio (LCR)	According to Article 412 (1) of CRR, the liquidity coverage ratio (LCR) is designed to promote short-term resilience of the Issuer's / Group's liquidity risk profile and aims to ensure that the Issuer / Group has an adequate stock of unencumbered High Quality Liquid Assets (HQLA) to meet its liquidity needs for a 30 calendar day liquidity stress scenario.	The LCR is expressed as: (stock of HQLA) / (total net cash outflows over the next 30 calendar days) $\geq 100\%$. The numerator of the LCR is the stock of HQLA (High Quality Liquid Assets). In order to qualify as HQLA, assets should be liquid in markets during a time of stress and, in most cases, be eligible for use in central bank operations. The denominator of the LCR is the total net cash outflows, defined as total expected cash outflows minus total expected cash inflow in the specified stress scenario for the subsequent 30 calendar days. Total cash inflows are subject to an aggregate cap of 75% of total expected cash outflows, thereby ensuring a minimum level of HQLA holdings at all times. Example for 2024: $\frac{12,319,781.0}{6,618,331.0 - 2,057,367.0} = 270.1\%$ Example for 2023: $\frac{11,062,683.8}{6,528,404.6 - 2,033,178.9} = 246.1\%$	246.1%	246.1%	270.1%
ROE, consolidated	The return on equity ratio shall be calculated the consolidated profit after tax for the given period divided by the average equity, thus shows the effectiveness of the use of equity.	The numerator of the indicator is the consolidated profit after tax for the given period (annualized for periods less than one year), the denominator is the average consolidated equity. (The definition of average equity: calendar day-weighted average of the average balance sheet items in periods comprising the given period, where periods comprising the given period are defined as quarters (and within that months) in case of 1H, 9M and FY periods, and months in case of quarters. Furthermore, the average of the average balance sheet items is computed as the arithmetic average of closing balance sheet items for the previous period and the current period.) Example for 2024: $\frac{1,076,139.4 * 1.0}{4,582,285.5} = 23.5\%$ Example for 2023: new methodology $\frac{990,459.5 * 1.0}{3,639,782.4} = 27.2\%$ Example for 2023: old methodology $\frac{990,459.5 * 1.0}{3,639,782.4} = 27.2\%$	27.2%	27.2%	23.5%
ROE (adjusted), consolidated	The return on equity ratio shall be calculated the consolidated adjusted profit after tax for the given period divided by the average equity, thus shows the effectiveness of the use of equity.	The numerator of the indicator is the consolidated adjusted profit after tax for the given period (annualized for periods less than one year), the denominator is the average consolidated equity. Example for 2024: $\frac{1,076,139.4 * 1.0}{4,582,285.5} = 23.5\%$ Example for 2023: new methodology $\frac{904,952.5 * 1.0}{3,639,782.4} = 24.9\%$ Example for 2023: old methodology $\frac{1,008,582.9 * 1.0}{3,639,782.4} = 27.7\%$	27.7%	24.9%	23.5%

⁹ The NBH's recommendation (5/2017, 24 May) on Alternative Performance Measures (APM) came into effect from 1 June 2017, in line with ESMA's guidance (ESMA/2015/1415) on the same matter. The recommendation is aimed at – amongst other things – enhancing the transparency, reliability, clarity and comparability of those APMs within the framework of regulated information and thus facilitating the protection of existing and potential investors.

¹⁰ Based on the prudential consolidation scope, which is different from the consolidation scope used in this report.

Alternative performance measures name	Description	Calculation (data in HUF million)	Measures value		
			2023 old methodology	2023 new methodology	2023 new methodology
ROA (adjusted), consolidated	The return on asset ratio shall be calculated the consolidated adjusted net profit for the given period divided by the average total asset, thus shows the effectiveness of the use of equity.	The numerator of the indicator is the consolidated adjusted net profit for the given period, the denominator is the average consolidated total asset. (The definition of average asset: calendar day-weighted average of the average balance sheet items in periods comprising the given period, where periods comprising the given period are defined as quarters (and within that months) in case of 1H, 9M and FY periods, and months in case of quarters. Furthermore, the average of the average balance sheet items is computed as the arithmetic average of closing balance sheet items for the previous period and the current period.) Example for 2024: $\frac{1,076,139.4 * 1.0}{41,688,546.3} = 2.6\%$ Example for 2023: new methodology $\frac{904,952.5 * 1.0}{37,168,362.1} = 2.4\%$ Example for 2023: old methodology $\frac{1,008,582.9 * 1.0}{37,168,362.1} = 2.7\%$	2.7%	2.4%	2.6%
Operating profit margin (adjusted), consolidated	The operating profit margin shall be calculated the consolidated adjusted net operating profit for the given period divided by the average total assets, thus shows the effectiveness of the operating profit generation on total assets.	The numerator of the indicator is the consolidated adjusted net operating profit for the given period, the denominator is the average consolidated total assets. Example for 2024: $\frac{1,545,377.0 * 1.0}{41,688,546.3} = 3.71\%$ Example for 2023: new methodology $\frac{1,265,909.2 * 1.0}{37,168,362.1} = 3.41\%$ Example for 2023: old methodology $\frac{1,260,849.8 * 1.0}{37,168,362.1} = 3.39\%$	3.39%	3.41%	3.71%
Total income margin (adjusted), consolidated	The total income margin shall be calculated the consolidated adjusted total income for the given period divided by the average total assets, thus shows the effectiveness of income generation on total assets.	The numerator of the indicator is the consolidated adjusted total income for the given period (annualized for periods less than one year), the denominator is the average consolidated total assets. Example for 2024: $\frac{2,633,907.7 * 1.0}{41,688,546.3} = 6.32\%$ Example for 2023: new methodology $\frac{2,245,706.5 * 1.0}{37,168,362.1} = 6.04\%$ Example for 2023: old methodology $\frac{2,224,584.2 * 1.0}{37,168,362.1} = 5.99\%$	5.99%	6.04%	6.32%
Net interest margin (adjusted), consolidated	The net interest margin shall be calculated the consolidated adjusted net interest income for the given period divided by the average total assets, thus shows the effectiveness of net interest income generation on total assets.	The numerator of the indicator is the consolidated adjusted net interest income for the given period (annualized for periods less than one year), the denominator is the average consolidated total assets. Example for 2024: $\frac{1,782,603.6 * 1.0}{41,688,546.3} = 4.28\%$ Example for 2023: new methodology $\frac{1,461,849.8 * 1.0}{37,168,362.1} = 3.93\%$ Example for 2023: old methodology $\frac{1,459,693.5 * 1.0}{37,168,362.1} = 3.93\%$	3.93%	3.93%	4.28%
Operating cost (adjusted)/ total assets, consolidated	The indicator shows the operational efficiency.	The numerator of the indicator is the consolidated adjusted operating cost for the given period (annualized for periods less than one year), the denominator is the average consolidated total assets. Example for 2024: $\frac{1,088,530.7 * 1.0}{41,688,546.3} = 2.61\%$ Example for 2023: new methodology $\frac{979,797.3 * 1.0}{37,168,362.1} = 2.64\%$ Example for 2023: old methodology $\frac{963,734.3 * 1.0}{37,168,362.1} = 2.59\%$	2.59%	2.64%	2.61%

SUMMARY OF THE FULL-YEAR 2024 RESULTS

Alternative performance measures name	Description	Calculation (data in HUF million)	Measures value		
			2023 old methodology	2023 new methodology	2023 new methodology
Cost/income ratio (adjusted), consolidated	The indicator is another measure of operational efficiency.	The numerator of the indicator is the consolidated adjusted operating cost for the given period, the denominator is the adjusted operating income for the given period. Example for 2024: $\frac{1,088,530.7}{2,633,907.7} = 41.3\%$ Example for 2023: new methodology $\frac{979,797.3}{2,245,706.5} = 43.6\%$ Example for 2023: old methodology $\frac{963,734.3}{2,224,584.2} = 43.3\%$	43.3%	43.6%	41.3%
Provision for impairment on loan and placement losses (adjusted)/ average (adjusted) gross loans, consolidated	The indicator provides information on the amount of impairment on loan and placement losses relative to gross customer loans.	The numerator of the indicator is the consolidated adjusted provision for impairment on loan and placement losses for the given period (annualized for periods less than one year), the denominator is the adjusted consolidated gross customer loans for the given period. (The definition of average (adjusted) gross customer loans: calendar day-weighted average of the average balance sheet items in periods comprising the given period, where periods comprising the given period are defined as quarters (and within that months) in case of 1H, 9M and FY periods, and months in case of quarters. Furthermore, the average of the average balance sheet items is computed as the arithmetic average of closing balance sheet items for the previous period and the current period.) Example for 2024: $\frac{89,863.8 * 1.0}{23,446,341.1} = 0.38\%$ Example for 2023: new methodology $\frac{71,689.9 * 1.0}{21,377,407.9} = 0.34\%$ Example for 2023: old methodology $\frac{34,780.7 * 1.0}{21,377,407.9} = 0.16\%$	0.16%	0.34%	0.38%
Total risk cost (adjusted)/ total asset ratio, consolidated	The indicator shows the amount of total risk cost relative to the balance sheet total.	The numerator of the indicator is consolidated adjusted total risk cost for the given period (annualized for periods less than one year), the denominator is the average consolidated total assets for the given period. Example for 2024: $\frac{66,032.5 * 1.0}{41,688,546.3} = 0.38\%$ Example for 2023: new methodology $\frac{39,098.5 * 1.0}{37,168,362.1} = 0.23\%$ Example for 2023: old methodology $\frac{2,970.4 * 1.0}{37,168,362.1} = 0.10\%$	0.01%	0.11%	0.16%
Effective tax rate (adjusted), consolidated	The indicator shows the amount of corporate income tax accounted on pre-tax profit.	The numerator of the indicator is consolidated adjusted corporate income tax for the given period, the denominator is the consolidated adjusted pre-tax profit for the given period. Example for 2024: $\frac{310,743.2}{1,386,882.6} = 22.4\%$ Example for 2023: new methodology $\frac{274,271.5}{1,179,224.0} = 23.3\%$ Example for 2023: old methodology $\frac{213,745.5}{1,222,328.4} = 17.5\%$	17.5%	23.3%	22.4%
Net loan/deposit ratio (FX-adjusted), consolidated	The net loan to deposit ratio is the indicator for assessing the bank's liquidity position.	The numerator of the indicator is the consolidated net consumer loan volume (gross loan reduced the amount of provision), the denominator is the end of period consolidated consumer FX-adjusted deposit volume. Example for 2024: $\frac{23,361,637.9}{31,666,401.0} = 74\%$ Example for 2023: new methodology $\frac{22,549,534.3}{30,937,626.9} = 73\%$ Example for 2023: old methodology $\frac{22,549,534.3}{30,937,626.9} = 73\%$	73%	73%	77%

SUPPLEMENTARY DATA

METHODOLOGICAL SUMMARY OF THE CHANGE IN THE SCOPE OF ADJUSTMENT ITEMS

In accordance with the management's decision, the scope of adjustment items presented in the stock exchange report on consolidated level changed from 1Q 2024.

According to the methodology applied until the end of 2023 (hereinafter: **old methodology**), in 2023 the following adjustment items were carved out of the regular P&L accounts of individual segments, with after tax amount: dividends and net cash transfers, goodwill/investment impairment charges, special tax on financial institutions, expected one-off effect of the interest rate cap for certain loans in Hungary and Serbia, effect of the winding up of Sberbank Hungary, effect of acquisitions, result of the treasury share swap agreement, and impairments on Russian government bonds at OTP Core and DSK Bank.

According to the methodology applied from 2024 onwards (hereinafter: **new methodology**), only the following adjustment items are carved out and presented on consolidated level, with after tax amount: goodwill impairment, and the direct effect of acquisitions. Starting from 2024, the direct effect of acquisitions includes only three items: badwill and initial risk cost related to acquisitions, and the gain or loss on the sale of a subsidiary. Under the old methodology, the effect of acquisitions line included further acquisition-related items, such as integration costs, and customer base value amortization.

From 3Q 2024, a materiality threshold was introduced: the relevant items are presented amongst adjustments only if the given item exceeds 10% of the quarterly consolidated profit after tax.

Under the new methodology, items previously presented as adjustments are now presented in the relevant geographical or business segment where they occurred (e.g. the special banking taxes in Hungary are presented partly within OTP Core and partly within Merkantil Group segment).

For the sake of comparability, in the report the relevant consolidated tables are presented in accordance with both the old and the new methodologies, including data for 2024 under the old methodology¹¹.

This change in methodology does not affect the consolidated and separate balance sheets, as, according to both the old and the new methodologies, the adjustment items affect only the profit and loss statement and the relevant performance indicators calculated from the profit and loss lines concerned, but not the balance sheet.

¹¹ For the actual period, under the old methodology the *Dividends and net cash transfers* adjustment line is zero, as taking into account its magnitude, this item is presented on the *Other net non-interest income* line.

FOOTNOTES OF THE TABLE 'CONSOLIDATED PROFIT AFTER TAX BREAKDOWN BY SUBSIDIARIES (IFRS)'

General note: regarding OTP Core and other subsidiaries, the adjusted profit after tax is calculated without the effect of adjustment items according to the new methodology.

(1) Aggregated adjusted profit after tax of OTP Core and foreign banks.

(2) OTP Core is an economic unit for measuring the result of core business activity of OTP Group in Hungary. Financials of OTP Core are calculated from the partially consolidated IFRS financial statements of certain companies engaged in OTP Group's operation in Hungary. These companies include OTP Bank Hungary Plc., OTP Mortgage Bank Ltd, OTP Building Society Ltd, OTP Factoring Ltd, OTP Financial Point Ltd., and companies providing intragroup financing; OTP Bank Employee Stock Ownership Plan Organization was included from 4Q 2016; OTP Card Factory Ltd., OTP Facility Management Llc., MONICOMP Ltd. and OTP Real Estate Leasing Ltd. were included from 1Q 2017 (from 1Q 2019 OTP Real Estate Lease Ltd. was eliminated from OTP Core); OTP Mobile Service Llc. and OTP Ingatlanpont Llc. were included from 1Q 2019; OTP Ecosystem Ltd. (previous name: OTP eBIZ Ltd., it was eliminated from 1Q 2023) was included from 1Q 2020; OTP OTP Home Solutions was included from 2Q 2021; Bajor-Polár Center Real Estate Management Ltd., CIL Babér Ltd., BANK CENTER No. 1. Ltd. and MFM Project Investment and Development Ltd. were included from 1Q 2024 (in 4Q 2024, MFM Project Investment and Development Ltd and Bajor-Polár Center Real Estate Management Ltd merged into BANK CENTER No. 1. Investment and Development Ltd. At the same time OTP Facility Management Ltd., which was already part of OTP Core before 2024, merged into CIL Babér Ltd.).

(3) The result and balance sheet of OTP Factoring Bulgaria EAD and DSK Leasing AD is included.

(4) Until August 2024, including the statement of recognised income and balance sheet of SKB Banka d.d. Ljubljana, SKB Leasing d.o.o., SKB Leasing Select d.o.o. and from February 2023 Nova Kreditna Banka Maribor d.d. In August 2024, the merger of SKB Banka and Nova KBM was completed.

(5) The statement of recognised income and balance sheet of OTP Leasing d.d. was included.

(6) The financial performance of OTP Factoring Serbia d.o.o, OTP Lizing d.o.o., OTP Leasing Srbija d.o.o., OTP Osiguranje A.D.O. and OTP Services d.o.o. is included.

(7) The balance sheet of Ipoteka Bank in Uzbekistan was consolidated from June 2023, whereas the adjusted profit of Ipoteka Bank was recognized in the consolidated P&L from 3Q 2023.

(8) Figures are based on the aggregated financial statements of OTP Bank JSC, LLC OTP Leasing, and OTP Factoring Ukraine LLC.

(9) The statement of recognised income and balance sheet of OTP Debt Collection d.o.o., and the acquired Podgoricka banka (which merged into the Montenegrin bank in 4Q 2020) was included.

(10) The balance sheet of the newly acquired Alpha Bank Albania was included from July 2022, its statement of recognised income from August 2022. Alpha Bank Albania merged with OTP Bank Albania in December 2022.

(11) The statement of recognised income and balance sheet of LLC MFO "OTP Finance" is included.

(12) In July 2024 the sale of the Romanian bank was financially closed, therefore the Romanian segment contributed to the Group results until June 2024.

(13) The subconsolidated adjusted profit after tax of Merkantil Group (Merkantil Bank Ltd., Merkantil Bérlet Ltd., OTP Real Estate Leasing Ltd., NIMO 2002 Ltd., SPLC-P Ltd., SPLC Ltd.) was presented.

(14) LLC AMC OTP Capital, DSK Asset Management EAD (Bulgaria), ILIRIKA DZU a.d. Belgrade (Serbia), and OTP Asset Management SAI S.A. (Romania) until September 2024.

(15) Velvin Ventures Ltd. (Belize), SC Aloha Buzz SRL, SC Favo Consultanta SRL, SC Tezaur Cont SRL (Romania), OTP Solution Fund (Ukraine), Mendota Invest d.o.o. (Slovenia), R.E. Four d.o.o., Novi Sad (Serbia).

(16) The adjusted profit after tax of the Hungarian operation line includes the adjusted profit after tax of the Hungarian subsidiaries, as well as the eliminations allocated onto these entities.

(17) The adjusted profit after tax of the Foreign operation line includes the adjusted profit after tax of the Foreign subsidiaries, as well as the eliminations allocated onto these entities.

CALCULATION OF THE ADJUSTED LINES OF IFRS PROFIT AND LOSS STATEMENTS, AS WELL AS THE ADJUSTED BALANCE SHEET LINES PRESENTED IN THE REPORT, AND THE METHODOLOGY FOR CALCULATING THE FX-ADJUSTED BALANCE SHEET AND P&L DYNAMICS

In order to present Group performance reflecting the underlying business trends, the presented consolidated and separate / sub-consolidated profit and loss statements of this report were adjusted, among others, in the following ways, and the adjusted P&Ls are shown and analysed in the Report (unless otherwise stated). Consolidated financial statements together with separate figures of OTP Bank are disclosed in the *Financial Data* section.

The details of the methodology change affecting adjustment items can be found in the *Methodological summary of the change in the scope of adjustment items* section.

Adjustments affecting the income statement:

- The after tax effect of adjustment items (certain, typically one-off items from banking operations' point of view) are shown and analysed separately in the Statement of Recognised Income.
- Performance indicators (such as cost/income ratio, net interest margin, risk cost to average gross loans as well as ROA and ROE ratios, etc.) presented in this report are calculated on the basis of the adjusted profit and loss statement excluding adjustment items (unless otherwise indicated).
- Starting from 2Q 2023 and applied also for the base periods, in the *Consolidated financial highlights and share data* table the *Book Value Per Share* and the *Tangible Book Value Per Share*, as well as indicators derived from these are calculated based on the consolidated diluted share count used for EPS calculation.
- Within the report, FX-adjusted statistics for business volume developments and their product breakdown, as well as the FX-adjusted stock of allowances for loan losses are disclosed, too. For FX-adjustment, the closing cross currency rates for the current period were used to calculate the HUF equivalent of loan and deposit volumes in the base periods. Thus, the FX-adjusted volumes for the base periods are different from those published in previous reports.
- The *FX-adjusted* changes of certain consolidated or sub-consolidated P&L lines in HUF terms may be presented in

this Report. According to the applied methodology in the case of the P&L lines, the FX effect is filtered out only in relation to the currency of the given country, irrespective of the transactional currency mix in which the given P&L line materialized. Thus, for instance, as for the consolidated FX-adjusted operating cost development, the effect of the Hungarian Forint rate changes against the given currency is not eliminated in the case of the cost items arising in FX within the Hungarian cost base.

Adjustments affecting the balance sheet:

- On 9 February 2024 OTP Bank announced the signing of the share sale and purchase agreement to sell its Romanian operation, and the transaction was financially completed on 30 July 2024. As a result of this, according to IFRS 5, starting from the end of 2023 until June 2024, the Romanian operation was presented as an asset classified as held for sale in the consolidated balance sheet, and as discontinued operation in the income statement. With regards to the consolidated balance sheet, from 4Q 2023 all Romanian assets and liabilities were shown on a separate line in the balance sheet. As for the consolidated income statement, in 4Q 2023 for full-year 2023, and in the 2024 actual period the Romanian contribution was shown separately from the result of continuing operation, on the *Net loss / gain from discontinued operation* line, i.e. from 4Q 2023 the particular P&L lines in the 'continuing operations' section of the P&L don't incorporate the contribution from the Romanian subsidiaries. As opposed to this, in the adjusted financial statements presented in the Stock Exchange Report – in line with the structure of the financial statements monitored by the management – until its deconsolidation the Romanian operation was presented in a way as if it was still classified as continuing operation, i.e. its net interest income contribution was presented on the net interest income line in the consolidated adjusted income statement.
- In the adjusted balance sheet, net customer loans include the stock of loans at amortized cost, loans mandatorily at fair value through profit or loss, and finance lease receivables.
