Article 89(2)(c)(iv) of Delegated Regulation (EU) No 2017/565 and Article 11(2)(c)(iv) of Delegated Regulation (EU) No 2017/567	Information on any data provided in addition to market data		Reference data and index basket data is also available.	
Article 89(2)(c)(v) of Delegated Regulation (EU) No 2017/565 and Article 11(2)(c)(v) of Delegated Regulation (EU) No 2017/567	Date of the last licence fee adaption for market data provided		02/01/2023	
Article 89(2)(d) of Delegated Regulation (EU) No 2017/565 and Article 11(2)(d) of Delegated Regulation (EU) No 2017/567	Total Market Data Revenues (EUR)		3 348 052	
	Market Data Revenues as a proportion of total Revenues (%)		31%	
Article 89(2)(e) of Delegated Regulation (EU) No 2017/565	<b>Information on cost accounting methodology: year 2021</b>			
	<b>Information on how the price was set, including the cost accounting methodologies used and information about the specific principles according to which</b>		The market data prices were set on reasonable commercial basis, by considering all the relevant direct- and indirect cost types. Types of costs included in setting the price:	

<p><i>and Article 11(2)(e) of Delegated Regulation (EU) No 2017/567</i></p>	<p><b>direct and variable joint costs are allocated and fixed joint costs are apportioned</b></p>	<ul style="list-style-type: none"><li>• General, common (direct) costs ( Overhead costs incurred in the normal operation of the Exchange which are not directly related to the production and/or distribution of market data. However, without taking into account these costs, the revenue-generating activity of selling information cannot be understood as they are incurred in the creation of conditions necessary and sufficient for the operation of the Exchange.)</li><li>• Business (indirect) costs ( Include types of costs that are specifically incurred for the business (i.e. non-support/administrative) areas of the Exchange.)</li><li>• Taxes</li></ul> <p>The costing methodology is based on the proportion of live labour associated with the production and/or distribution of market data. In order to establish an appropriate allocation rate, BSE has taken into account which of the Exchange's employees' daily work is related to the process of selling information. For these employees, BSE examined what percentage of their total working time is spent on tasks related to the production and/or distribution of market data. The allocation key for the different cost types is based on the location of the cost group.</p> <p>For the purpose and result of its sales activity, BSE applies reasonable margin in its market data pricing. The profit margin provided on a reasonable commercial basis added to the actual costs is determined by taking into account the return on revenue, return on costs, return on operational assets, the return on equity and market conditions.</p>
