# As weak as it gets in 2020

- The total comprehensive income was a loss of HUF 0.66 bn in 2020, compared to HUF 0.95 bn profit in 2019. The primary reason why earnings went in to the red was the COVID-19 pandemic-triggered lockdowns and travel restrictions, which exerted a drag on incomes from normally high-margin service activities (e.g. car renting), while the weaker HUF against the EUR, which combined with the planned costs relating to the acquisitions of the new dealerships and the effect of a shift in the product mix of the international business line, i.e.an increase in the number of models with lower profit margins, also weighed on earnings.
- Sales of HUF 88.4 bn were up 19% YoY despite the coronavirus pandemic, which hit the automotive services business segment, in particular. The decline in car rental sales was offset by an increase in international automotive and parts sales as well as domestic retail turnover of newly acquired subsidiaries. The AutoWallis Group increased vehicle sales by

- 39.4% in 2020, within which the Wholesale Division's new vehicle sales increased by 34.3%, and its retail business grew by 42.6%.
- Aftermarket activity remained strong in terms of sales (car servicing and vehicle parts sales), as did international distribution segment (+2% YoY); the latter thanks to higher group sales. Meanwhile, the number of service hours was up 34%, but the fleet size for car rental dropped by 60% and the number of rental transactions fell by 27% YoY
- COGS grew by 20% YoY, faster than sales, therefore gross margin dropped from 14.4% to 12.6% in 2020 mainly due to fluctuations in supply and demand due to the coronavirus situation and adverse FX movements which were partially offset by higher sales volumes. The 52% increase in personnel expenses also exceeded that of sales, driven by the acquisitions of dealerships.
- EBITDA decreased by 28% YoY to HUF 2,139 million, which was mainly
  worsened by the impact of the sudden and drastic drop of tourism and
  therefore car rental, and by the start-up costs of the new domestic Jaguar
  Land Rover retail business launched in April, BMW retail in Ljubljana and Opel
  wholesale activities launched in four countries in December.
- The loss on the financial income and expenses lines was HUF 1.1 bn, which is close to twice as high as losses in 2019. The primary reason for this outstanding amount of losses was the significant weakening of the HUF against the EUR (FX loss was HUF 691 million). In addition to exchange rate effects, there was an increase of HUF 0.15 million in interest expenses, which was related to new companies acquired and the issuance of a new bond. We note that the rapid devaluation of the HUF and other regional currencies against the EUR as a result of COVID-19 resulted in a significant exchange rate loss booked among financials; however we note that, such events generally have a delayed inflationary effect in car markets, and so AutoWallis is also typically able to implement a price increase later. For items relating to export activities which are typically invoiced in euros and for financing arrangements which are also generally denominated in euros, this effect (being naturally hedged) is observable only during the closing of accounts at the end of the period as an unrealized exchange rate difference.
- Net debt increased YoY to HUF 19.2 bn vs. HUF 11.2 bn in 2019. AutoWallis issued bonds in a total value of HUF 3.04 bn under the NBH's Bond for Growth Bond Program. Net debt ratio decreased from 73.1% to 65.2%, while net debt-to-EBITDA ratio temporarily jumped to 8.9x from 3.7x partly due to the FX impact, on our calculation. We reckon the indebtedness as relatively high, with a potential for a significant decrease in the mid run.

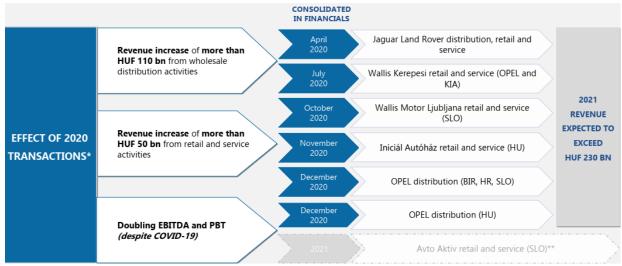

# Increased appetite for inorganic growth

- Over the course of 2020, AutoWallis announced a number of sizeable transactions, as follows, in an attempt to increase its revenue fivefold by 2025 from HUF 75 bn in 2019 by having access to capital markets and relatively cheap external financial resources, thus becoming a leading mobility service provider in the Central and Eastern European region:
  - the acquisition of the largest Hungarian Opel dealership Wallis Kerepesi Ltd (with annual sales of over 2,100 vehicles) and K85 Ltd. (the owner of the dealership real estate);
  - winning the distribution rights for OPEL vehicles inSlovenia, Croatia and Bosnia-Herzegovina (with annual sales of 11,700 vehicles)
  - winning the exclusive distributor rights of Jaguar and Land Rover models in Hungary (with annual sales over 500 vehicles);

- the acquisition of the largest BMW dealership in Slovenia (with annual sales close to 800 vehicles i); and also importantly, signing an agreement with another significant player on the Slovenian car market, Avto Aktiv retailing 6 brands (BMW, MINI, Jaguar, Land Rover, Toyota, Suzuki) with annual sales of over 850 vehicles;
- the acquisition of a 60% stake in Iniciál Autóház, a market leader in Western Hungary selling and servicing seven high-profile car brands (Dacia, Nissan, Opel, Peugeot, Renault, Suzuki and Toyota), with annual sales of over 3,500 vehicles; while car service turnover is also significant in addition to the substantial new and used vehicle sales.

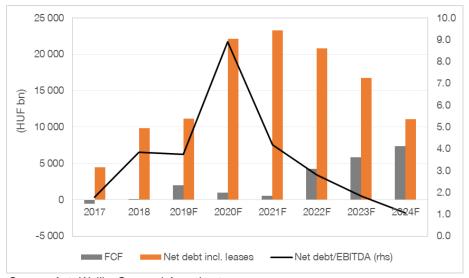

#### AutoWallis' transactions closed in 2020

Note: \* On 2019 basis, if plans achieved \*\* Initial agreement signed (on Nov 13th, 2020), not presented in 2020 forecast figures
Source: AutoWallis

- · AutoWallis financed these transactions with
  - issuing new shares in an amount of HUF 1.37 bn subscribed by domestic institutional investors, therefore increasing free float from 14% to over 30%:
  - issuing bonds in a value of HUF 3.04 bn;
  - and receiving back dividend in a total amount of HUF 560 mn from its principal stockholder, WAM.
- AutoWallis plans to issue additional shares targeting domestic retail investors in an amount of approx.. HUF 1.5-2 bn this year. As a result of these capital increases, AutoWallis aims to achieve a 20% equity-to-liabilities ratio to supplement debt capacity by up to HUF 15 bn. With EBITDA rising substantially AutoWallis' ND/EBITDA ratio should fall well below 2x by 2025 on our estimate.

#### AutoWallis' ND/EBITDA ratio

# Q1/21 sales figures reflect the positive impact of last year's transactions

According to AutoWallis' Q1/21 sales report, in the wholesale business, the number of new vehicles sold jumped almost fourfold to 4,555 units (+ 382.5% YoY). The outstanding growth was driven by a 32.5% increase (1,251 vehicles) of organic expansion and Opel sales, which began in four countries earlier this year, wholesale sales of this brand alone increased the sales number by 250% YoY or 3,304 units. The retail business also performed well amid the still shrinking domestic market (-1% YoY). The number of new vehicle sales without the impact of last year's transactions increased by 42% YoY, while incorporating the impact of last year's transactions (Inicial Autóház, Wallis Kerepesi, domestic Jaguar and Land Rover sales and the Ljubljana BMW dealership) vehicles sales increased by 238% to 1,678 units. The number of used vehicle sold also advanced by 132% to 434 units, including transactions (in an apple-to-apple comparison there was an 8% fall sales in terms of the number of vehicles sold). The service hours increased by 40 percent without last year's transactions, while due to the four transactions mentioned overall it increased by 152.7% YoY to 29,447. Restrictions due to the coronavirus pandemic are still holding back growth opportunities in the car rental area, but the number of rental days has already increased by 43% YoY and economies of scale improved thanks to expansion (the fleet size declined by 22% YoY and the number of leases by 48%, respectively).

Operation highlights in Q1/2021

	Q1/21	Q1/20	Ch (%)
Wholesale

#### Outlook

Despite structural headwinds (such as economic rigidities in the labor market as well as the service sector, low market power, large misallocated capital stocks, declining population, weak private credit demand, relatively low corporate profit margins along with deleveraging in the wake of a liquidity trap and poor trend growth etc.), which exert a drag on economic vigor, recent economic data in Europe foretell the recovery (in both relative and nominal terms) of passenger vehicles sales. Registration volume and fiscal stimulus bode well for the vehicles markets, while regulatory efforts could increase significantly, prompting a shift in the mix of new cars sold towards hybrids and EVs. For the Eurozone the anticipated increase in growth for 2021 is markedly less than global economic growth (just 3.9% after a fall of 6.8% in Europe's GDP in 2020 vs. 5.6%). The sustainable growth rate of carmakers' and car dealers' earnings is a function of the return on equity and the dividend payout ratio, which though currently being at their lows, is set to gradually improve in the coming years, driven, among others by new service and mobility solutions.

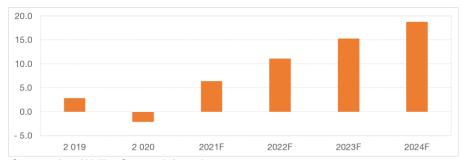

AutoWallis' car sales estimates for the period between 2021 and 2024

Source: AutoWallis, Concorde's estimates

We believe supportive trends may be observed in all CEE and SEE vehicles markets (including both the used and new cars segments) where AutoWallis is present. Said this, AutoWallis could take advantage of rebounding business travels and tourism once COVID vaccine rollouts speed up in Europe and organically expand its operating margins primarily as a result of rebound in automotive service activities (e.g. car rent) and lean operations.

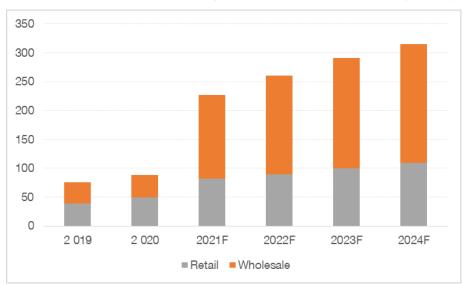

AutoWallis' EPS estimates for the period between 2021 and 2024 (HUF bn)

Source: AutoWallis, Concorde's estimates

 AutoWallis' revenue and EBITDA goals of HUF 90-100 bn and HUF 4.3-4.6 bn of the Strategy 2019 are expected to be exceeded already in 2021, respectively, as a result of the transactions closed in 2020.

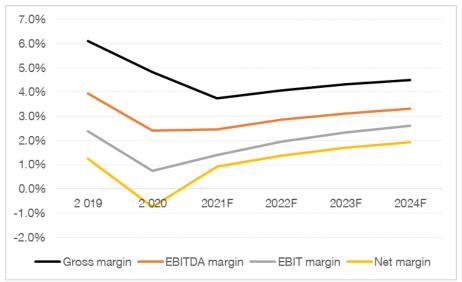

AutoWallis' sales estimates for the period between 2021 and 2024 (HUF bn)

Source: AutoWallis, Concorde's estimate

• AutoWallis anticipates reaching revenue of more than HUF 230 bn and EBITDA of nearly HUF 6 bn in 2021, and it also has ambitious goals of annual revenue of more than HUF 400 bn and EBIT(DA) margin of approx. 3.5%, implying EBITDA of around. HUF 14 bn, to be achieved by 2025. While we believe AutoWallis can grow significantly in the forthcoming years thanks to the aforementioned acquisitions, car rental and fleet management, accessory businesses and new mobility solutions, we are a bit less optimistic about revenue and EBITDA stream coming in by 2025 than what management guidance suggests. We are expecting EBITDA to increase to around HUF 12 bn on revenue of HUF 340 bn in 2025.

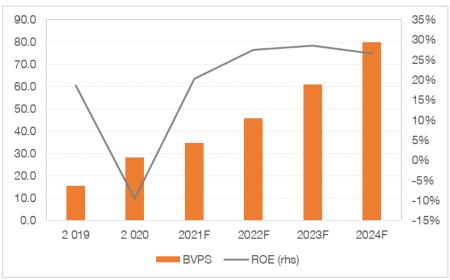

AutoWallis' margin estimates for the period between 2021 and 2024

Source: AutoWallis, Concorde's estimate

• We penciled the positive impact of both synergies and growth potential inherent in the recent transactions on sales and earnings in our estimates, while also believing that the recovery in service revenues, containing above-average margins, will be rapid and significant after the pandemic abates. Nevertheless, the market environment remains volatile, in our view. Extending economic lockdowns and potential revival of wage pressure, surging yields are among the key macro risks we identify but AutoWallis has proved that it has the ability to deal with such headwinds successfully, simultaneously taking care of its FCFF.

AutoWallis' ROE estimates for the period between 2021 and 2024

Source: AutoWallis, Concorde's estimate

- We expect AutoWallis not to pay meaningful dividend until the current growth cycle ends.
- AutoWallis' B+ rating was reaffirmed by Scope Ratings last November in light of recovering vehicles market conditions, improving its outlook from stable to

- positive. In case of failure to meet the condition, AutoWallis would be obliged to repurchase bonds it issued in the framework of NBH's Bond for Growth program. Odds for such a scenario seem very unlikely at this point.
- Our DCF model points to HUF 142 per share 12-month TP (implying a 42% upside), up from HUF 130 previously.
- The comparative valuation implies some discount over a two-year time horizon. AutoWallis is now trading at P/E and EV/EBITDA multiples, based on our new 2022 earnings estimates, of 9.0x and 7.2x. We are thus reiterating our Accumulate recommendation for the stock.

Source: Bloomberg, Concorde's estimate

- Risks: We attribute the highest potential opportunity to easing of tensions related to COVID-19 spread and upswing of the economic sentiment, at least in the EU. The highest risks, are related to extending lockdowns and potential revival of wage pressure. Also importantly, climbing yields increase the discount factor applied to the long-term deferred cash flows that contribute a large proportion of the intrinsic value of growth stocks. Aside macroeconomic headwinds, there is the risk of poor execution of consolidating recently acquired assets.
- We once again stress that our 12-month TP is highly sensitive to AutoWallis' operating margin developments. We reiterate our Accumulate rating on AutoWallis. We assume a significant improvement in AutoWallis' ROIC by 2024, driven mainly by expected EBITDA margin expansion, which thus is likely to exceed peers' ROIC ratio, justifying relatively higher valuation multiples for AutoWallis. We emphasize, however, that a "good" company, which is able to deliver formidable excess return over cost of capital on a sustainable basis due to its competitive advantages and supporting economic cycles does not necessarily equate with a "good investment". Despite an enviable set of economic characteristics, entrenched competitive position (there not many car dealer companies that come and dislodge AutoWallis from the CEE and SEE vehicle markets) we reckon that AutoWallis can turn out to be a poorly perform stock for quite a while because of its low free float affecting its market liquidity on a low-liquidity emerging stock market. We are afraid that the upside potential of valuation might only be realized after AutoWallis' sales exceed the EUR 1 bn threshold level, and therefore it gets promoted to the premier league of European car dealers while also appearing as a takeover target on the radar screen of large competitors.

DISCLAIMER

Concorde Securities Ltd. does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interests that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For analysts' certification and other important disclosures, please refer to the "Disclaimer" section at the end of this report.

#### DISCLAIMER I.

This research report has been prepared by Concorde Securities Ltd., a full-service Hungarian investment banking, investment management and brokerage firm. Concorde Securities Ltd. is under the supervision of the National Bank of Hungary in its capacity as financial supervisory authority.

Concorde Securities Ltd. is registered in Hungary and does not have any subsidiaries, branches or offices outside of Hungary. Therefore we are not allowed to provide direct investment banking services to US investors and restrictions may apply to our potential investment banking services according to your country's jurisdiction.

Our salespeople, traders and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are their own and may be contrary to the opinions expressed in our research products, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed by our analysts or traders.

Our research, sales and trading professionals are paid based on the profitability of the respective divisions of Concorde Securities Ltd., which from time-to-time may include revenues from the firm's capital market activity. Concorde Securities Ltd. does not prohibit analysts, salespeople and traders from maintaining a financial interest in the securities or futures of any companies that they cover or trade on their clients' behalf in strict compliance with the Hungarian Capital Markets Act.

#### ANALYSTS CERTIFICATION

The research analysts undersigned and responsible for the preparation of this report hereby certify that (i) the views expressed in this research report accurately reflect their personal views about any and all of the securities or issuers referred to in this research report; (ii) no part of the analysts' compensation was, is or will be directly or indirectly related to the specific recommendation or views expressed in this report and (iii) no part of their compensation is tied to any specific investment transactions performed by Concorde Securities Ltd.

Name and job title of individuals involved in the production of this report are disclosed at the end of this report.

Concorde Securities Ltd. is a leading manager and underwriter of Hungarian equity offerings. We have investment banking and other business relations with a substantial percentage of the companies traded on the Budapest Stock Exchange and covered by our research department. Concorde Securities Ltd, its directors and employees may have a position in these securities, which may change at any time.

Concorde Securities Ltd. acted as Lead Manager of the private and public share placement of the shares of FHB in 2003, Masterplast in 2012 and Duna House in 2016. Concorde Securities Ltd. acted as the Co-lead Manager of Gedeon Richter's exchangeable bond issue in September 2004. Concorde Securities Ltd. has provided financial advice to Magyar Telekom.

#### **EXPLANATION OF RATINGS AND METHODOLOGY**

Rating	Trigger
